Milestone[®] VM

EPA Reg. No. 62719-537

24(c) Special Local Need Registration SLN NC-100004

**For Control or Suppression Of Blackberry (briars), Vines And Susceptible
Broadleaf Weeds In Newly Planted Longleaf Pine Plantations.
(For Distribution and Use Only in the State of North Carolina)**

Special Conditions and Risks of Use

USE OF MILESTONE VM HERBICIDE (THE "PRODUCT") AS AN OVER-THE-TOP TREATMENT TO NEWLY PLANTED LONGLEAF PINE SEEDLINGS (THE "CROP") MAY RESULT IN CROP INJURY, CROP YIELD REDUCTION AND/OR CROP LOSS TO THE CROP. READ AND UNDERSTAND THESE SPECIAL CONDITIONS AND RISKS OF USE BEFORE USING THE PRODUCT ON THE CROP.

Dow AgroSciences makes the Product available for use in the manner described in this Supplemental Labeling on the basis that, in the sole opinion of the user, the benefits and utility derived from the use of the Product on the Crop outweigh the potential risk of Crop injury or loss. The decision to use this Product in the manner described in this Supplemental Labeling must be made by each individual user on the basis of anticipated benefits versus (i) the risk of Crop injury, Crop yield reduction and Crop loss, (ii) the severity of the target pest infestation, (iii) the cost and availability of alternative pest controls, and (iv) any other relevant factors.

By purchasing the Product for use, or using the Product, in the manner described in this Supplemental Labeling, you acknowledge and accept that:

- (1) you assume all risk of Crop injury, Crop yield reduction and/or Crop loss;
- (2) Dow AgroSciences does not make, and does not authorize any agent or representative to make, any representations or recommendations regarding the use of this Product on the Crop other than the statements on this Supplemental Labeling;
- (3) Dow AgroSciences does not make, and does not authorize any agent or representative to make, any warranties, express or implied, with respect to the use of the Product on the Crop and disclaims all warranties, express or implied, including any implied warranties of fitness for a particular purpose or merchantability;
- (4) Dow AgroSciences disclaims all liability for any damages, losses, expenses, claims or causes of actions arising out of or relating to inability to sell the Crop, Crop injury, Crop yield reduction and/or Crop loss;
- (5) these Special Conditions and Risks of Use supersede any contrary representations or recommendations by Dow AgroSciences, its agents or representatives, and any provisions in or on any Product literature or labeling including any provisions on the label affixed to the Product container.

If these Special Conditions and Risks of Use are not acceptable, the unopened Product may be returned to the seller for a refund or used for a different labeled use in accordance with the label affixed to the Product container. These Special Conditions and Risks of Use are required by Dow AgroSciences and not specified by the U.S. EPA or the State of North Carolina.

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read this SLN labeling and the label affixed to the container for Milestone® VM herbicide before applying. All applicable use directions, precautions and restrictions on this SLN labeling and the label affixed to the container must be followed.

Directions for Use

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about Personal Protective Equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material as polyethylene or polyvinyl chloride
- Shoes plus socks

Refer to product label for General Use Precautions and Restrictions, Mixing and Application instructions.

For suppression or control of blackberry and other susceptible broadleaf weeds and vines in newly planted longleaf pine plantations, apply up to 7 fl oz of Milestone VM per acre. Applications may be applied over-the-top of longleaf pines; however, do not use any surfactant with these applications. Less damage to planted longleaf pines has been observed while in the "grass stage" of development (usually 1 to 2 year old planted trees), so this timing is recommended. **Some injury has been observed from use of Milestone VM applied over-the-top of longleaf pines that are emerging from the grass stage (growth flush with exposed candles/buds) or at later stages.**

Good results with minimal damage/impact have been observed on less than 1 year old longleaf seedlings and mixed stands of 1,2, and 3 year old longleaf seedlings as long as they are still in the grass stage of development.

Applications may include broadcast, banded, or directed/spot treatments.

To broaden the spectrum of weeds and vines controlled, apply up to 7 fl oz of Milestone VM in tank mix combination with 5 fl oz Arsenal AC (or equivalent imazapyr product) per acre. Refer to the Arsenal AC (or equivalent imazapyr product) label for General Use Precautions and Restrictions, Mixing, and Application instructions.

Based on field experience, application during the spring and early summer growing season provides good weed control with little potential for damage to planted longleaf pine in the "grass" stage. Later season timing or dormant season timing has not been evaluated, but is not restricted by this label.

Applications should be made when target weeds are actively growing with healthy and abundant foliage. Do not exceed the maximum use rate of 7 fl oz Milestone VM per acre.

Application Notes: For best control from broadcast and directed spray applications of Milestone VM, use a spray volume which will provide thorough plant coverage. Recommended spray volumes are usually 15 to 25 gallons per acre.
