

# FIFRA

## Section 2(ee) Recommendation

Date: November 15, 2017

Product: Agri-Mek® SC Miticide/Insecticide  
EPA Reg. No. 100-1351

Use: Suppression of silk fly in sweet corn

State: FL

### Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Agri-Mek SC will provide suppression of silk fly when applied at a rate of 3.5 fl. oz/A.

It is recommended to apply Agri-Mek SC as a tank-mix with another effective silk fly product to achieve the best control.

To avoid illegal residues, Agri-Mek SC **must** be mixed with a non-ionic activator type wetting, spreading and/or penetrating spray adjuvant. Do not use binder or sticker type adjuvants. (See **Use Information** section of the Agri-Mek SC Section 3 label and see the **Use Restrictions** following the **Corn, Sweet Crop Use Directions** section on the Section 3 label.)

Applications should be timed to the most susceptible insect pest stage at locally determined action thresholds, before populations reach damaging levels.

Thorough coverage is essential to obtain best results. Apply this product diluted in a minimum volume of 10 gal/A by ground or 5 gal/A by air. Under conditions such as high pest populations, dense foliage, or adverse application conditions (such as high temperatures), use a greater volume of water to ensure adequate coverage.
