- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.
- This labeling must be in the possession of the user at the time of pesticide application. Always read and follow all labels.
- This recommendation is made as permitted under FIFRA §2(ee) and has not been submitted to or approved by the EPA.

Direction of Use

CROPS	PEST	RATE PINT S/AC RE	SPRAY DIRECTIONS
APPLES GRAPE S PEACH ES	Spotted lanternfly (SLF)	1 – 3.5	Apply AZA-DIRECT as a foliar spray to control insects. Always follow equipment manufacturer's use directions. Use the diluted mixture within 8 hours. Do not apply in irrigation water if the pH exceeds 7.0. The optimum pH range for application is 5.5-6.5. If needed, the pH of the irrigation water can be adjusted by use of a suitable buffering agent. Do not use less than 5 oz. per acre of Aza-Direct alone.

Foliar application Instruction:

Apply AZA-DIRECT in sufficient spray volume and with adequate spray pressure to ensure complete and thorough coverage of all plant surfaces including both the top and bottom of leaves. Avoid excessive runoff. Best results can be obtained following 2-3 applications made at 7-10 day intervals. When pest pressure is heavy or plant canopy is dense, use higher rates and increase spray frequency. Spraying in the morning or evening hours will provide the best results. Repeat application if rain occurs within two to three hours of spraying.
