

SUPPLEMENTAL LABEL

AEGIS

EPA Reg. No. 42750-222

FOR CONTROL OF SCIARID FLY LARVAE IN MUSHROOM CASING

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Note: All applicable directions, restrictions, and precautions on the AEGIS package label are to be followed. This labeling contains supplemental instructions and restrictions for use of this product which may not appear on the package label. Read and follow all precautionary statements and all other information appearing on the product label.

This labeling must be in the possession of the user at the time of pesticide application.

APPLICATION TO CASING

AEGIS can be applied as a single low-volume drench spray to the casing material.

Apply at 14 or more days after the compost application at a rate of 5 ppm (3.0 fl oz/ton) to the casing material.

Do not make more than two applications of AEGIS during a mushroom production cycle (one to the compost followed by one to the casing).

Do not apply to the casing within 14 days of harvest.

Do not use in animal feeds.
