- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions and precautions on the EPA registered label are to be followed.
- This recommendation must be in the possession of the user at the time of pesticide application.
- This recommendation is made as permitted under FIFRA §2(ee) and has not been submitted to or approved by the EPA.

DIRECTIONS FOR USE

CROP	PEST	RATE	COMMENTS
All Labeled Crops	Deer	2% v/v solution of this product	Apply M-Pede in a minimum of 10 gpa.
<ul style="list-style-type: none">• Apply pre-emergence and/or post-emergence to labeled crops, including soybeans.• The addition of an adjuvant that prevents wash-off may improve longevity of repellency when applied as a post emergence treatment.• Applications with other pesticides, foliar fertilizers and such should be jar tested before application to insure compatibility. Not all tank mixes have been tested for crop safety.• Do not mix with sulfur or apply within 3 days of a sulfur application.• Do not apply in temperatures above 85 degrees.• Do not make more than three consecutive applications per season.• Reapply every 7 – 14 days.			

Refer to the label affixed to the container for M-Pede for general use precautions and restrictions, mixing instructions, and application guidelines. Read and follow all applicable directions for use, precautions and limitations.
