## Fontelis® FUNGICIDE

EPA Reg. No. 352-834

This supplemental label expires on April 30, 2027, and must not be used or distributed after this date.

### FOR USE IN TUBEROUS AND CORM VEGETABLES AND LEAVES

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in possession of the user at the time of application.
- Read the label affixed to the container for Fontelis® before applying.
- Use of Fontelis according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Fontelis.

#### Product Information

Fontelis is a broad-spectrum fungicide, recommended for control of foliar and soil-borne plant diseases in many listed crops, and has preventive, curative, and locally systemic activity. Fontelis must be applied in a regularly scheduled protective spray program in rotation with other fungicides. See directions below for specific crop/disease recommendations.

Fontelis can be applied with commonly used ground equipment, hose-end, pressurized, and greenhouse sprayers, air or chemigation equipment, except as otherwise directed, using sufficient water to obtain thorough coverage of plants. Thorough coverage of all foliage is essential for effective disease control. Maintain agitation during mixing and application to assure uniform product suspension.

#### Use Restrictions

- Use this product only in commercial and farm plantings.
- Do not use for home plantings.
- Do not formulate this product into other end-use products.
- Do not sell, sell into, distribute, or use in Nassau or Suffolk Counties, New York.
- In New York, do not exceed 61 fl oz (0.80 lb ai) per acre per year.

**Fontelis fungicide labeled Crop and Crop Groups, Pre-Harvest Intervals, Maximum Single Application Rates, and Total Rates allowed per year**

Crop, Crop group or subgroup with examples <sup>†</sup>	Minimum Time from Application to Harvest (PHI days)	Maximum Rate per Acre per Application fl oz product (lb active ingredient)	Maximum Product per Acre per Year fl oz product (lb active ingredient)
<b>Tuberous and corm vegetables and leaves</b> <b>Potato, sweet potato, yam</b>	7 days	24 fl oz (0.31 lb)	72 fl oz** (0.94 lb)**

\*\*In New York, do not exceed 61 fl oz (0.80 lb ai) per acre per year.

<sup>†</sup>Refer to the crop specific direction for use tables to determine exactly which crop species in each crop area or crop group are included.

**Use Rates and Application Instructions**

Crop/Crop Group	Target Diseases	Use Rate per Acre (fl oz)	Application Instructions
<b>Tuberous and corm vegetables and leaves, including only:</b> Potato; Arracacha; arrowroot; artichoke, Chinese; artichoke, Jerusalem; canna, edible; cassava, bitter and sweet; chayote (root); chufa; dasheen (taro); ginger; leren; sweet potato; tanier; turmeric; yam bean; yam, true	Alternaria early blight and brown spot ( <i>Alternaria solani</i> , <i>Alternaria alternata</i> ) Gray mold ( <i>Botrytis cinerea</i> ) Powdery mildew ( <i>Erysiphe</i> spp.)	10 - 24 fl oz (0.13 – 0.31 lb ai/A)	Begin applications prior to disease development and continue on a 7- to 14-day interval. Use higher rate and shorter interval when disease pressure is high.
	Black dot ( <i>Colletotrichum coccodes</i> )	14 - 24 fl oz (0.18 – 0.31 lb ai/A)	
	<b>Disease suppression</b> White mold ( <i>Sclerotinia sclerotiorum</i> )	14 - 24 fl oz (0.18 – 0.31 lb ai/A)	Make initial application at 100% full bloom of the primary inflorescence, or prior to row closure, and then again 14 days later.
	<b>Soil-borne diseases</b> Rhizoctonia stem canker and black scurf ( <i>Rhizoctonia solani</i> )	0.7 - 1.6 fl oz/1000 row ft (0.009 – 0.021 lb ai/1000 row ft)	At-plant, in-furrow application. Maximum rate per acre per application is 24 fl oz.  See soil-borne disease section instructions.

**RESTRICTIONS:** Make no more than 2 sequential applications of Fontelis before switching to a fungicide with a different mode of action. Minimum time (PHI) between application and harvest is 7 days. Do not exceed 72 fl oz (0.94 lb ai) of Fontelis/acre per year. In New York, do not exceed 61 fl oz (0.80 lb ai) per acre per year.

Do not use Fontelis fungicide for an in-furrow application when penthiopyrad has been applied as a seed piece treatment for potatoes. Do not apply more than two in-season foliar potato applications of Fontelis at the maximum single application rate when penthiopyrad has been used as a seed piece treatment for potatoes. Do not apply more than 15 oz of penthiopyrad ai/acre/year to potatoes in total from any combination of seed, soil, or foliar treatments.

**Specific Restrictions for Use in New York State**

Make no more than 2 sequential applications of Fontelis before switching to a fungicide with a different mode of action. Minimum time (PHI) between application and harvest is 7 days. Do not exceed 61 fl oz (0.80 lb ai) of Fontelis/acre per year.

Do not use Fontelis fungicide for an in-furrow application when penthiopyrad has been applied as a seed piece treatment for potatoes. Do not apply more than one in-season foliar potato application of Fontelis at the maximum single application rate when penthiopyrad has been used as a seed piece treatment for potatoes. Do not apply more than 10 oz of penthiopyrad ai/acre/year to potatoes in total from any combination of seed, soil, or foliar treatments.
