GF-120[®] NF Naturalyte[®] Fruit Fly Bait

EPA Reg. No. 62719-498

Special 2(ee) Recommendation[†]
For Distribution and Use Only in the State of Florida

Preharvest Interval for All Crops

ATTENTION

[†]This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for GF-120[®] NF Naturalyte[®] Fruit Fly Bait insecticidal bait before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of GF-120 NF according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for GF-120 NF.

Directions for Use

Refer to product label for GF-120 NF for General Use Precautions, Mixing and Application instructions.

There is no preharvest interval when GF-120 NF is applied to any tree, fruit, nut, vine, vegetable or any other food crop and ornamentals to control multiple species of tephritid fruit flies. Do not enter or allow worker entry into treated areas during the restricted entry interval of 4 hours except as allowed under the Agricultural Use Requirements section of the product label when the specified PPE is worn.
