## Blackhawk®

EPA Reg. No. 62719-523

### Special 2(ee) Recommendation<sup>†</sup>

#### For Control of Sorghum Midge and Lepidoptera Pests in Grain Sorghum

Refer to product label for Blackhawk for general use precautions, mixing directions, application directions, and restrictions.

#### ATTENTION

<sup>†</sup>This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Blackhawk® Naturalyte insecticide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Blackhawk® Naturalyte according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Blackhawk® Naturalyte.

#### Directions for Use

Pest	Blackhawk (oz/acre)
sorghum midge armyworms corn earworm (headworm) southwestern corn borer webworms	1.5 – 3.3 (0.034 – 0.075 lb ai/acre)

Refer to the Blackhawk product label for General Use Precautions, Mixing Directions and Application Directions. Blackhawk should be used as part of an integrated program to manage sorghum pests.

**Application Timing:** Treat in accordance with local economic thresholds. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

**Application Rate:** Apply as a foliar spray at the rate specified to control sorghum midge and Lepidoptera pests. Use a higher rate in the rate range for heavy infestations, advanced growth stages of target pests, or difficult spray coverage situations.

#### Restrictions:

- **Preharvest Interval:** Do not apply within 21 days of grain or straw harvest or within 3 days of forage, fodder or hay harvest.
- **Minimum Treatment Interval:** Do not make applications less than 4 days apart.
- Do not apply more than a total of 12.4 oz of Blackhawk (0.28 lb ai of spinosad) per acre per year.
- **Maximum Number of Applications:** Do not make more than three applications per acre per year.
- Do not make more than two consecutive applications.
- Do not allow cattle to graze treated area until spray has dried.
