## DIRECTIONS FOR USE

For best results, use watered-in applications. May be applied via irrigation system or prior to irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach. Use the higher label rates with surface and flood irrigation.

DO NOT mix with other products in concentrated form without first adding water. Recommended mixing sequence: water, adjuvants, pesticides, Valent BioSciences nutrient products, other fertilizers, balance of water while agitating. A standard jar test is recommended before tank mixing.

Usar las dosis de la etiqueta más altas con riego por inundación y por superficie.

No mezclar con otros productos en forma concentrada sin antes agregar agua. Secuencia de mezcla recomendada: Agua, adyuvantes, pesticidas, productos nutritivos de Valent BioSciences, otros fertilizantes y balance de agua mientras agita.
