DIRECTIONS FOR USE

This product bulletin serves as supplemental labeling for use of PREQUEL™ herbicide in Kansas. The following restrictions include specific requirements beyond those found under the "Restrictions For Use On Field Corn" section of the container label. Refer to the PREQUEL™ herbicide label and technical bulletins for full descriptions of use restrictions.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ENVIRONMENTAL PRECAUTIONS

Refer to the container label for additional use precautions and directions. Agricultural chemicals have the potential to move into shallow groundwater. The following restrictions have been developed to protect drinking water supplies.

Do not wash, load, or empty application equipment near any well, as this practice is a potential source of ground water contamination. In fields having soils with less than 15% field moisture holding capacity, special care must be taken not to over-irrigate, since substantial over-irrigation promotes the leaching of chemicals.

Do not use in the following counties in Kansas: Sedgwick, Harvey, McPherson, Reno, Rice, Pratt, Stafford, Barton, Kiowa, Edwards and Pawnee.

SOIL TYPE RESTRICTIONS

If the water table is less than 25 feet below ground surface, do not apply to the following vulnerable sandy loam, loamy sand or sand soils. If the water table is unknown, do not apply PREQUEL™ herbicide to a restricted soil.

Albion	Crisfield	Glenberg	Las Animas	Sarpy
