EPA Reg. No. 42750-49

### **RANGE STAR**

EPA Reg. No. 42750-55

### **FALLOW STAR**

EPA Reg. No. 42750-63

### **RANGE STAR XLT**

EPA Reg. No. 42750-286

IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE ANY APPLICATION OF ANY 2,4-D HERBICIDE PRODUCT UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE.

The above referenced Albaugh 2,4-D products are NOT approved for application to 2,4-D tolerant GMO crops, including cotton and soybeans.

DO NOT APPLY 2,4-D HERBICIDES TO ANY 2,4-D TOLERANT GMO CROP IN 2018 UNLESS you use a 2,4-D herbicide product that is specifically labeled for that use in the location where you intend to make the application.

In addition to US EPA regulations, certain states have or may adopt additional restrictions or regulations for 2,4-D and other auxin class herbicides (such as dicamba) that may not be on the EPA approved label. These requirements may affect all 2,4-D products regardless of whether such products are labeled for in-crop use on 2,4-D tolerant GMO crops. Such restrictions may include:

- Timing of application
- Permitted uses
- Extended buffer zones
- Applicator certification requirements.

For more information, before applying 2,4-D growers and applicators should contact the U.S. EPA, your state pesticide regulatory agency, and/or your university Extension Service to identify the requirements applicable to their intended use of 2,4-D.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS.
