

FIFRA Sec. 2(ee) Recommendation

Revylok™

Fungicide

Reduced Aerial Application Minimum Spray Volume Per Acre

For use in states where this product is registered.

This Section 2(ee) Recommendation expires on December 31, 2026.

EPA Reg. No. 7969-503

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

All applicable directions, restrictions, precautions, and Conditions of Sale and Warranty on the EPA registered container label are to be followed.

Information contained in this Section 2(ee) Recommendation is not intended to replace or amend any product labeling. Always read and follow all label directions when using any pesticide alone or in tank mix combinations.

The user must have this recommendation in their possession at the time of use.

Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.

Directions For Use

For aerial applications of **Revylok™ Fungicide**, use a minimum spray volume of 2 gallons of spray solution per acre. **DO NOT** apply in spray solutions less than 50% water by volume. Reduced spray volumes used in aerial application may result in physical incompatibility, reduced disease control, or crop injury, particularly when mixed with other products.
