

AZOXY TEB

EPA REG. NO. 42750-285

REDUCED RATE ON PEANUT TO CONTROL EARLY LEAF SPOT

FIFRA Section 2(ee) recommendation for use in AL, FL, GA, NC, SC, VA

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by U.S. EPA,

APPLICATION INFORMATION

AZOXY TEB can be applied in a preventative program beginning 35 to 40 days after planting, or at the first appearance of disease. Continue applications on a 14-day schedule. AZOXY TEB may also be used in State Agricultural Extension advisory programs (disease forecasting) which recommend application timing based on environmental factors favorable for disease development.

CROP	TARGET DISEASE	USE RATE
Peanut	Early leaf spot (<i>Cercospora arachidicola</i>)	6.4 - 8.6 fl oz/Acre

Remarks: Foliar applications provide 14 to 21 days of control. For optimum control of foliar diseases, apply AZOXY TEB with the lowest label rate of a spray surfactant. When applying AZOXY TEB as directed ground application, additional methods should be employed for leaf spot control.
