

## Onslaught®

MICROENCAPSULATED INSECTICIDE

Onslaught® Microencapsulated Insecticide uses controlled-release technology that delivers long-lasting residual control for a broad spectrum of insects.

- Kills 100+ insects, including mosquitoes that may transmit Zika virus
- Controls German cockroaches for up to 12 months  
*\*Indoor, unsealed concrete and/or cement surfaces only*
- Flexible application methods, including indoor and outdoor broadcast use
- Matches the rain fastness of leading competitors

### PRODUCT SPECIFICATIONS

<b>Key Target Pest(s)</b>	Ants, cockroaches, darkling beetles, fleas, flies, mosquitoes, scorpions, spiders and wasps
<b>Signal Word</b>	Caution
<b>Form</b>	Concentrate
<b>Active Ingredient(s)</b>	Esfenvalerate
<b>Class of Chemistry</b>	Pyrethroid (3A)
<b>Activity</b>	Residual
<b>Mode of Action</b>	Sodium channel modulator
<b>Stability</b>	If frozen, thaw and shake before use
<b>Flammability</b>	Not listed as flammable or combustible
<b>Odor</b>	Sweet
<b>PPE Requirements</b>	Protective eyewear (goggles, face shield or safety glasses with side shields)
<b>Retreat Interval</b>	7 days (indoors, outdoor ornamentals and landscaping); 14 days (food handling/processing establishments)
<b>Mix or Dilute In</b>	Water only
<b>Shelf Life</b>	3 years or more in ideal storage conditions

### Packaging

- 1 pint unit (6 per case)
- 1 gallon unit (2 per case)
- 30-gallon drum

### Use Sites

#### Indoor and Outdoor Areas

- Residential homes
- Commercial buildings
- Food and non-food areas
- Lawn and turf
- Ornamentals and landscaping

#### Livestock Areas

- Livestock housing
- Poultry housing

#### Apply when animals are not present

## Application Methods

- Broadcast (indoor and outdoor)
- Foliar sprays
- Structural perimeter treatments
- Surface sprays
- Spot, Crack/crevice treatments
- Void injection

## Recommended Equipment

- Handheld or backpack sprayers
- Backpack mist blowers
- Mist sprayers
- Power sprayers
- Low volume injector equipment

## Mix Rates

Refer to the label for all mix rates on specific insects and use instructions.

Application Site	Key Target Pests	Dilution Rate	Application Method
Outdoor Use			
Mosquito habitats	Mosquitoes	0.5 fl. oz. per gallon or in sufficient water to cover 1,000 sq. ft.	Broadcast spray, foliar, spot
Lawn and turf, Ornamentals, landscaping	Ants, fleas, ticks	0.1 - 1 fl. oz. per gallon or in sufficient water to cover 1,000 sq. ft.	Broadcast spray, foliar, spot
Nests and harborage areas of listed stinging insects	Hornets, wasps, yellowjackets	1 fl. oz. per gallon or in sufficient water to cover 1,000 sq. ft.	Spot, crack and crevice
Exterior structures	Ants, boxelder bugs, darkling beetles, flies, spiders	0.5 - 1 fl. oz. per gallon or in sufficient water to cover 1,000 sq. ft.	General surface spray, spot, crack and crevice
Indoor Use			
Food and nonfood areas	Ants, bed bugs, cockroaches, fleas, darkling beetles, flies and stored product pests	0.5 - 1 fl. oz. per gallon	Broadcast surface spray, spot, crack and crevice, wall void injection

## Microencapsulation Technology

Onslaught microcaps have a semi-permeable shell with a spongy interior that allows the active ingredient to be released over time for long-lasting residual control. Both the residual active ingredient and the microcaps can be picked up by the pest. The distribution of microcap sizes helps target a broad spectrum of pests, from ants and mosquitoes to scorpions.

## MGK Sustainability in Action

- Water-based, non-flammable formulation concentrated to reduce transportation carbon emissions
- Container is HDPE and 100% recyclable
- Shipping cartons and paper labels are sourced from Sustainably Managed Forests
- Formulated in a production facility that uses 100% renewable energy
- Tip and measure bottle helps applicators use lowest effective quantity, thus reducing waste
