

## SUPPLEMENTAL LABELING

This supplemental label expires on March 31, 2026 and must not be used or distributed after this date.  
READ THE ENTIRE LABEL FOR ROUNDUP WEATHERMAX® HERBICIDE BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

EPA Reg. No. 524-537

---

### USE WITH AGRISURE® GT CORN

---

Keep out of reach of children

### CAUTION

In case of an emergency involving this product, Call Collect, day or night, 1-800-334-7577.

---

#### DIRECTIONS FOR USE

---

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This label must be in the possession of the user at the time of herbicide application.

Read the label affixed to the Roundup WeatherMAX® Herbicide container before applying.

Use of Roundup WeatherMAX® Herbicide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the Roundup WeatherMAX® Herbicide container.

AVOID CONTACT OF THIS HERBICIDE WITH FOLIAGE, GREEN STEMS, EXPOSED NON-WOODY ROOTS OR FRUIT OF CROPS, EXCEPT AS DIRECTED FOR USE ON ROUNDUP READY® AND OTHER GLYPHOSATE-TOLERANT CROPS, DESIRABLE PLANTS AND TREES, AS SEVERE PLANT INJURY OR DESTRUCTION COULD RESULT.

See "PRODUCT INFORMATION" and "MIXING" sections of the Roundup WeatherMAX® Herbicide labeling for essential product information.

---

TYPES OF APPLICATION: Preplant; At-Planting; Preemergence; Postemergence (In-crop); Spot Treatment; Preharvest; Post-Harvest

Maximum Application Rates	
Combined total per year for all applications	5.3 quarts per acre
Total for all Preplant, At-Planting, Preemergence applications	3.3 quarts per acre
Maximum single In-crop application rate up to V8 stage or 30-inch corn	22 fluid ounces per acre
Total for all In-crop applications from emergence through V8 stage or 30-inch corn	44 fluid ounces per acre
Maximum Preharvest application rate after maximum kernel fill is complete and the crop is physiologically mature (black layer formation) until 7 days before harvest	22 fluid ounces per acre

### **Preplant, At-Planting, Preemergence**

USE INSTRUCTIONS: This product may be applied alone or in a tank mixture before, during or after planting Agrisure GT corn.

TANK MIXTURES: This product may be tank-mixed with one or more products containing the active ingredients listed below. Apply these tank mixtures in 10 to 20 gallons of water, or 10 to 60 gallons of nitrogen solution, per acre. Refer to the individual label of all products used in the tank mixture for approved uses and application rates. Read and follow all label directions. It is the responsibility of the pesticide user to ensure that the intended use is included on the label of all products added to a tank mixture. Users must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture.

---

2,4-D; acetochlor; atrazine; bicyclopyrone; carfentrazone-ethyl; clopyralid; dicamba; diflufenzopyr; dimethenamid; dimethenamid-P; flufenacet; flumetsulam; flumiclorac pentyl ester; fluthiacet-methyl; isoxaflutole; linuron; mesotrione; metolachlor; s-metolachlor; metribuzin; pendimethalin; pyroxasulfone; rimsulfuron; saflufenacil; simazine; tembotrione; thiencazone-methyl

---

RESTRICTIONS: Maximum quantity of this product that may be applied for all preplant, at-planting and preemergence applications combined is 3.3 quarts per acre per season. Application of 2,4-D or dicamba must be made a minimum of 7 days prior to planting corn.

**NOTE:** For maximum weed control, make a postemergence (in-crop) application of this product following the use of a preemergence residual product listed above.

### **Postemergence (In-crop)**

USE INSTRUCTIONS: This product may be applied alone or in a tank-mix over the top of Agrisure GT corn from emergence through the V8 stage (8 leaves with collars), or until corn plant height reaches 30 inches (freestanding), whichever comes first, unless otherwise directed. Maximum single in-crop application rate of this product is 22 fluid ounces per acre. Total in-crop application of this product from corn plant emergence through the V8 stage or 30 inches in height must not exceed 44 fluid ounces per acre.

When applied as directed, this product will control annual grasses and broadleaf weeds listed on the Roundup WeatherMAX® Herbicide label. Many perennial grasses and broadleaf weeds will be controlled or suppressed with one or more applications of this product. Make a postemergence application of 16 to 22 fluid ounces of this product per acre before weeds exceed 4 inches in height (before they become competitive with the crop). Repeat this application before new flushes of weeds exceed 4 inches in height.

TANK MIXTURES: This product may be tank-mixed with a product containing the active ingredient acetochlor or atrazine. Ensure that the product used is labeled for application postemergence (in-crop) to field corn. Refer to the individual label of all products used in the tank mixture for approved uses and application rates. Read and follow label directions for all products in the tank mixture. It is the responsibility of the pesticide user to ensure that the intended use is included on the label of all products added to a tank

mixture. Users must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture.

**PRECAUTIONS:** In-crop applications made alone or with the addition of other crop chemical products could result in a crop response. Contact your seed trait provider for more information.

**RESTRICTIONS:** Allow a minimum of 10 days between in-crop applications of this product. Allow a minimum of 50 days between application of this product and harvest of corn forage or grain.

#### **Preharvest**

**USE INSTRUCTIONS:** Up to 22 fluid ounces of this product per acre may be applied for annual and perennial weed control prior to harvest when kernel fill is complete, and the corn is physiologically mature (black layer formed) and grain moisture is 35 percent or less.

**RESTRICTIONS:** Allow a minimum of 7 days between application and harvest or feeding of corn stover or grain.

#### **Post-Harvest**

**USE INSTRUCTIONS:** This product may be applied for weed control after crop harvest. Higher rates might be needed for control of large weeds that were growing in the field at the time of harvest. Tank mixtures with 2,4-D or dicamba may be used. Ensure that the product used is labeled for post-harvest application in field corn. Read and follow label directions for all products in the tank mixture.

**RESTRICTIONS:** Allow a minimum of 7 days between application and harvest or the feeding of vegetation within the application area. Application must be made a minimum of 30 days prior to the planting of any crop not listed on this label.

---

Read the "Limit of Warranty and Liability" on the Roundup WeatherMAX® Herbicide product labeling before using. These terms apply to this supplemental labeling. If these terms are not acceptable, return the product unopened at once.
