This label expires and must not be distributed or used in accordance with this SLN registration after March 31, 2029.

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The state-specific Section 24(c) labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, and precautions on the EPA-registered main product label for **Beyond[®] Xtra herbicide**, EPA Reg. No. 241-441 and this label.

Application Instructions

Applications may be made by ground or air. Apply **Beyond Xtra** early postemergence at 6.0 fl ozs/A when the ladino clover has a minimum of 2 trifoliate leaves and when the majority of the weeds are 1-3 inches in height. **Beyond Xtra** applications must be made prior to clover bloom. Some transient stunting of ladino clover may occur after **Beyond Xtra** treatment. Plants will generally outgrow stunting within 3-4 weeks.

Application of **Beyond Xtra** in ladino clover requires the addition of an adjuvant and nitrogen fertilizer.

Adjuvants

Nonionic surfactant – use NIS containing at least 80% active ingredient. Apply NIS at 0.25% v/v (1 quart/100 gallons of spray solution).

Nitrogen Fertilizer

Specified nitrogen-based fertilizers include liquid fertilizers (including 28% N, 32% N, or 10-34-0) at 2.5 gallons/100 gallons of spray solution. Instead of liquid fertilizer, spray-grade ammonium sulfate may be used at 12 to 15 pounds/100 gallons of spray solution.

Specific Use Restrictions

- **Beyond Xtra** application must be made before clover bloom.
- **DO NOT** make more than one **Beyond Xtra** application to clover grown for seed per year (growing season).
- **DO NOT** apply more than 6.0 fl ozs of **Beyond Xtra**/acre (0.047 lb ae/acre) to clover grown for seed per year (growing season).
- The maximum single use rate of **Beyond Xtra** on clover grown for seed is 6.0 fl ozs/acre (0.047 lb ae/acre).
- If arid conditions occur during the year of application, rotational crop injury may occur.
- **DO NOT** apply to clover subjected to stress conditions, including hail damage, flooding, drought, injury from other herbicides, or widely fluctuating temperatures, or crop injury may result.
- **DO NOT** apply to weeds under stress, including lack of moisture, previous herbicide injury, mechanical injury, or cold temperatures, or unsatisfactory weed control could result.
- **DO NOT** apply this product through any type of irrigation system.
