

FIFRA 2(ee) Recommendation

FOR DISTRIBUTION AND USE ONLY WITHIN ALABAMA, ARKANSAS, DELAWARE, FLORIDA, GEORGIA, KANSAS, KENTUCKY, LOUISIANA, MARYLAND, MISSOURI, MISSISSIPPI, NORTH CAROLINA, NEW JERSEY, NEW MEXICO, OKLAHOMA, SOUTH CAROLINA, TENNESSEE, TEXAS AND VIRGINIA

VELUM®

EPA Reg. No. 264-1078

To allow for Twin Row in-furrow applications of VELUM® to soybeans.

This recommendation is valid until December 31, 2027

FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This product bulletin should be in the possession of the user at the time of application of the product. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its label.

SOYBEAN		
Pest Suppression	Application Rate	Application Instructions
Nematodes	3.0 to 6.0 fl oz/acre (0.098 – 0.195 lb/acre fluopyram)	In addition to the Soil Application methods listed on the label. Velum may be applied as follows: <ul style="list-style-type: none">• Velum may be applied in-furrow in Twin Row applications. If applying Velum in a Twin Row configuration, target fields with Low to Moderate nematode pressure, since splitting the applied Velum within Twin Rows will effectively lower the actual applied amount of Velum within the seed furrow.• Other considerations when planting a Twin Row configuration are: Utilize resistant varieties, plant in a field with lower nematode populations, and utilize a seed treatment.• Minimum 7-day interval between soil applications.

Restrictions:

- Maximum single application rate: 6.0 fl oz/acre of VELUM (0.195 lb/acre fluopyram)
- Maximum annual application rate: 13.7 fl oz of VELUM per acre (0.445 lb/acre fluopyram) per year.
- Maximum number of applications per year: 2 (at 6.0 fl oz/acre of VELUM)
- Minimum retreatment interval: 7 days
- **DO NOT** apply more than 0.446 lbs Fluopyram per acre per year, regardless of formulation or method of application (soil or foliar).
- Apply using ground or chemigation equipment.
- **DO NOT** apply VELUM within 14 days of harvest.
- To limit the potential for development of disease resistance to this fungicide class, **DO NOT** make more than 2 sequential applications of VELUM or any Group 7-containing fungicide before rotating with a fungicide from a different Group.
- For soil application, to limit the potential for development of disease resistance to this chemical class, it is advised that the first foliar fungicide application after VELUM be a product from a different FRAC group.
- **DO NOT** allow livestock to graze forage or hay and **DO NOT** harvest forage or hay for food or feed.

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577.

For PRODUCT USE Information Call 1-866-99BAYER (1-866-992-2937).

As with any crop-protection product, always read and follow label directions.

For additional information call toll-free 1-866-99BAYER (1-866-992-2937).
