Autumn™ Super 51 WDG Herbicide

EPA Reg. No. 264-1134

**Reduced application rates on high pH soils
where soybeans are the next planted
rotational crop the following Spring.**

PRODUCT BULLETIN

FOR DISTRIBUTION AND USE ONLY IN THE STATES OF COLORADO, IOWA, KANSAS, MISSOURI, NORTH DAKOTA AND OKLAHOMA

FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or accepted by the U.S. Environmental Protection Agency. This product bulletin should be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Autumn Super 51 WDG Herbicide may be used for burndown/residual weed control on no-till or conservation tillage fields anytime after fall harvest but prior to planting field corn or soybean the following spring at a recommended rate range of 0.3 to 0.5 ounces of product per acre. The 0.3 ounce per acre rate is recommended for application on soils having a soil pH ranging from 7.0 to 8.0. For soils with a pH from 7.0 up to but not including 7.5, soybeans can be safely replanted back at a minimum of 2 months following Autumn Super application. For soils with a pH of 7.5 to 8.0, soybean plant back should be delayed to a 9 month interval following Autumn Super application but can be reduced to a 4 month interval if STS soybeans are planted. Autumn Super is not recommended for use on soils with a pH > 8.0.
