

EPA Reg. No. 279-9607-100202

For Distribution and Use Only in the State of California

## FOR CONTROL OF ORANGE TORTRIX ON GRAPES IN THE STATE OF CALIFORNIA

### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Before using DAUNTLESS in accordance with this recommendation, read and follow all applicable directions for use, restrictions, and precautions on the EPA registered label, as found on the package.
- This recommendation should be in the possession of the user at the time of application.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

### DIRECTIONS FOR USE

Grapes			
Pest	Application Rate (fl oz/acre)	PHI (Days)	REI (Hours)
Orange tortrix	2.5 - 4.5 (0.055 - 0.099 lb ai/acre)	14	4
<ul style="list-style-type: none"><li>• Do not apply more than 9 fl oz (0.2 lb ai) of chlorantraniliprole containing products per acre per calendar year.</li><li>• Do not make more than 4 applications per calendar year.</li><li>• Refer to the UC IPM Pest Management Guidelines for adult emergence monitoring using pheromone traps and degree day accumulation to determine the timing of application to first or second generation. Make the first application at initiation of egg hatch, to small larvae, or first signs of infestations. To manage resistance, target only one of the two generations with DAUNTLESS or any other Group 28 containing insecticide.</li><li>• Use higher rates of DAUNTLESS for moderate to heavy insect pressure. Make repeat applications on a 7 to 10 day schedule if monitoring indicates continued feeding activity.</li><li>• Do not apply less than 30 gallons of water per acre by ground.</li></ul>
