- This labeling must be in the possession of the user at the time of application.
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling
- Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions on the registered label.

THIS PRODUCT IS APPROVED FOR USE ON AQUATIC SITES IN THE STATE OF WASHINGTON

**IMPORTANT:** This Supplemental label is NOT intended to be completed or provide all of the necessary information for application. Refer to the full text of the Bronc® Plus Dry-EDT label for additional information, precautions, restrictions and conditions of sales.

**WSDA Container Disposal Guidance:** Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site.

Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the internet from WSU at <http://pep.wsu.edu/waste/wd.html> or from WSDA at <http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm>.

Cleaned containers may also be disposed of in Washington.
