

TECHNICAL INFORMATION BULLETIN  
FOR THE USE OF STARGUS® BIOFUNGICIDE TO  
SUPPRESS Fusarium (*Fusarium oxysporum* f. sp. *lycopersici*) ON TOMATOES

**FIFRA Section 2(ee) Recommendation for use only in California**

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U. S. Environmental Protection Agency.

FOR USE IN CALIFORNIA ONLY

**STARGUS®**

**EPA Reg. No. 84059-28**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crop	Target Disease	Application Method	Product Use Rate per Application	Application Instructions
Tomato	Fusarium ( <i>Fusarium oxysporum</i> f. sp. <i>lycopersici</i> )	Soil drench Drip chemigation	3-4 quarts per acre	For soil drench applications apply this product as a soil drench following transplant or through chemigation. For application through sprinkler or sub-surface drip irrigation, apply at a concentration of 3 - 4 quarts per acre at seeding or transplant in up to 100 gallons of water, and in sufficient water to thoroughly soak the growing media and root zone. Make an initial application of this product during or shortly after transplant to reduce transplant shock, suppress <i>Fusarium oxysporum</i> and improve root growth. Multiple applications can be made on a 10- to 21-day interval. Applications can be made in-season through sub-surface drip irrigation.
STARGUS® has a <b>pre-harvest interval (PHI)</b> of <b>0 days</b> . Do not enter or allow worker entry into treated areas during the <b>restricted-entry interval (REI)</b> of <b>4 hours</b> .				

**All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.**

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

**This recommendation must be in the possession of the user at the time of pesticide application.**
