

FIFRA Sec. 2(ee) Recommendation

Arsenal[®]

Herbicide

For control of arrow-leaf elephant ear (*Xanthosoma sagittifolium*) at aquatic sites in Texas

This Section 2(ee) Recommendation expires on December 31, 2026

EPA Reg. No. 241-346

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

All applicable directions, restrictions, precautions, and Conditions of Sale and Warranty on the EPA registered container label are to be followed.

Information contained in this Section 2(ee) Recommendation is not intended to replace or amend any product labeling. Always read and follow all label directions when using any pesticide alone or in tank mix combinations.

The user must have this recommendation in their possession at the time of use.

Directions For Use

Use 4 to 6 pints/A (1.5% solution) applied in 100 GPA with a high quality sticker adjuvant. Rate is expressed in terms of product volume for broadcast applications and as % solution for directed applications including spot treatments. **For % solution applications, DO NOT apply more than the equivalent of 3 quarts of Arsenal[®] herbicide per acre.** Ensure good coverage of actively growing emergent foliage. See container label for all instructions and restrictions to applications made at aquatic sites.
