## SpinTor<sup>®</sup> 2SC

EPA Reg. No. 62719-294

### 2(ee) Recommendation<sup>†</sup>

For Distribution and Use Only in the State of Texas

### Provisional Chemigation Use on Certain Crops

#### ATTENTION

<sup>†</sup> This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to container for SpinTor<sup>®</sup> 2SC Naturalyte<sup>®</sup> insect control before applying. Carefully follow all precautionary statements and applicable use directions.
- Except as specified in this product bulletin, use of SpinTor 2SC is subject to all use precautions and limitations imposed by the label affixed to the container for SpinTor 2SC.

#### Directions for Use

**Note:** This product bulletin is intended for use only under the direction of a Dow AgroSciences' representative or approved cooperator.

**Sprinkler Irrigation:** SpinTor 2SC may be applied through overhead sprinkler irrigation systems according to the Directions for Use on the product label for SpinTor 2SC in the following crops: potatoes and sweet corn. In addition, SpinTor 2SC may be applied at recommended broadcast application rates via overhead sprinkler irrigation systems under the direction of a Dow AgroSciences' representative or approved cooperator to the following crops: cole crops (cabbage, broccoli, cauliflower), leafy greens (spinach, collards, mustards), cucurbits (melons, cucumbers), and onions. Follow general directions for chemigation in the product label for SpinTor 2SC.

Application by chemigation may be made at the recommended broadcast rate. For continuously moving systems, the mixture containing SpinTor 2SC must be injected continuously and uniformly into the irrigation water line as the sprinkler is moving. If continuously moving irrigation equipment is used, apply in no more than 0.25 inch of water. For sprinkler systems that do not move during operation, apply in no more than 0.25 inch of irrigation immediately before the end of the irrigation cycle.
