Starane[®] NXT

EPA Reg. No. 62719-557

2(ee) Recommendation[†]

Tank Mix with Harmony GT XP Herbicide for Improved Weed Control in Wheat, Durum or Barley

ATTENTION

[†] This recommendation is permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read and follow all applicable directions for use, precautions and limitations on the product label attached to the container for Starane NXT herbicide.

Starane[®] NXT herbicide may be applied in tank combination with 1/12 oz to 3/10 oz of Harmony GT XP herbicide for improved control of wild mustard, redroot pigweed and common lambsquarters. Apply as a broadcast postemergence treatment from the 3-leaf up to emergence of flag leaf crop stage of growth and before weed seedlings reach 4 inches tall. Only susceptible broadleaf weeds which have emerged at the time of application will be controlled. The use of 1 to 2 pints of non-ionic surfactant is recommended for the 1/12 oz and 3/10 oz per acre rates of Harmony GT XP in all areas, except the Red River Valley of Minnesota and North Dakota.

Follow applicable use directions, precautions, limitations on the EPA-registered labels for Starane NXT and Harmony GT XP herbicides.

Note: ALS resistant biotypes of target weeds will not be controlled by Harmony GT XP.
