## Accent<sup>®</sup> Q

EPA Reg. No. 352-773

### 2(ee) Recommendation<sup>†</sup>

For Distribution and Use Only in the State of Hawaii

## Zero Day Pre Harvest Interval for Corn Grown for Seed

### ATTENTION

† This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read and follow all applicable directions for use, precautions, and limitations on the product label attached to the container for this product.

## PRODUCT INFORMATION

Accent Q is a water-dispersible granule used at a rate of 0.45 - 1.8 ounces per acre for selective postemergence grass weed control in field corn grown for grain, seed or silage, popcorn and sweet corn.

Accent Q provides weed control via foliar absorption. Accent Q only controls those weeds that have emerged. For later-emerging weeds, a second application or a timely cultivation is required.

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**DO NOT** apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Accent Q must be used only in accordance with instructions on this label, or as otherwise permitted by FIFRA. **Always read the entire label, including the Limitation of Warranty and Liability.**

Accent Q may be broadcast or applied with drop nozzles to field corn grown for seed that is less than 20" tall (free-standing) or that exhibits up to and including 5 leaf-collars (V5), whichever is most restrictive. **DO NOT** apply to corn that is taller than 20" or that exhibits more than 5 leaf-collars (V5), whichever is more restrictive.

Not all seed corn inbreds have been tested, nor does Corteva Agriscience have access to all seed company data. Consequently, to the extent consistent with the law, Corteva Agriscience is not responsible for any crop injury arising from the use of Accent Q on field corn grown for seed. When tank mixing, check the tank mix partner label for uses and instructions for use.

**BIOLOGICAL ACTIVITY**

Accent Q provides best results when applied to young, actively growing weeds. Applications made during warm, moist conditions (70°F or more) and adequate soil moisture both before and after application maximizes performance.

Accent Q is rainfast in 4 hours.

Field Corn Grown for Seed has a zero day PHI.

**RESTRICTIONS**

CROPS	Maximum Oz of Product/ Acre/ Single Application	Maximum Lb AI/Acre/ Single Application	Maximum Number of Applications Per Year	Maximum Oz of Product /Acre/Year	Maximum Lb AI/A per Year	Retreat Interval (Days)	Last Treatment Preharvest Interval
Field Corn Grown for Seed	1.8 oz	0.061 lb ai	2	1.8 oz	0.061 lb ai	7	Corn grown for seed has a 0 (zero) day PHI
