DESCRIPTION

PERFECTION VASEKA PREMIX 5-3-4 is a high-quality, slow-release fertilizer developed for use in potting media for ornamental plants. This multi-component blend provides essential nutrients along with support for long-term pH stability. Designed with growers in mind, it simplifies custom potting mixes while sustaining plant growth over time.

BENEFITS

- Delivers a consistent, slowly available source of nitrogen. Includes calcium, magnesium, and sulfur to support plant structure and metabolism.
- Helps maintain pH stability over time. Compatible with a wide range of potting mix formulations.
- Developed specifically for nursery and greenhouse applications.

DIRECTIONS FOR USE

APPLICATION INSTRUCTIONS

- For professional use on residential and commercial landscapes, golf courses, athletic fields, parks, nurseries, greenhouses, and sod farms.
- For best performance, apply to dry plant material and water after application.
- Do not apply directly to an impervious surface.
- Keep away from pools, ponds and any bodies of water. Do not contaminate potable water.
- This product contains iron, which may cause staining. Keep off unwanted areas such as sidewalks, patios, fences, and painted areas. Sweep or blow any residual material on to treated areas after application.

RATE RECOMMENDATIONS

Apply 15-25 pounds per cubic yard of soil or potting media. Use the lower end of the rate range when mixes contain soil, clay, high levels of peat or coir, or water-retentive additives like polymers or starches. As with all fertilizers, it is recommended to conduct small-scale trials before full-scale use. Grower experience and judgment should guide rate selection and incorporation.
