Entrust[®] SC

EPA Reg. No. 62719-621

2(ee) Recommendation[†]

For Distribution and Use Only in the States of Alabama, Arkansas, Arizona, California, Florida, Georgia, Missouri, Nevada, New Mexico, Oklahoma, Oregon, Tennessee, Utah, Washington, and West Virginia

Provisional Overhead Sprinkler Chemigation Use on Certain Crops

ATTENTION

† This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read and follow all applicable directions for use, precautions, and limitations on the product label attached to the container for this product.
- Use of Entrust SC according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Entrust SC.

Directions for Use

Sprinkler Irrigation: In addition to cranberry, Entrust SC may be applied through overhead sprinkler irrigation systems to the following crops and crop groups listed on the label affixed to the container for Entrust SC: asparagus, *Brassica* (cole) leafy vegetables (crop group 5), bulb vegetables (crop group 3), bushberries (subgroup 13B), caneberries (Subgroup 13A), cucurbit vegetables (crop group 9), fruiting vegetables (crop group 8), grape, herbs (subgroup 19A), leafy vegetables (except *Brassica*) (crop group 4), legume vegetables (succulent and dried beans and peas) (crop group 6), root and tuber vegetables (crop group 1), strawberry and watercress.

Follow the directions for use and the directions for Chemigation Application on the label affixed to the container for Entrust SC. Application by overhead sprinkler chemigation to a crop listed above must be made at the specified broadcast rates on the product label. Follow all other specific requirements and restrictions for each crop as indicated on the label affixed to the container for Entrust SC.

For continuously moving systems, the mixture containing Entrust SC must be injected continuously and uniformly into the irrigation water line as the sprinkler is moving. If continuously moving irrigation equipment is used, apply in no more than 0.25 inch of water. For sprinkler systems that do not move during operation, apply in no more than 0.25 inch of irrigation immediately before the end of the irrigation cycle.

The level of pest control achieved when Entrust SC is applied through overhead sprinkler irrigation systems may be lower than the level that can be achieved when Entrust SC is applied with properly calibrated and well maintained ground sprayer equipment.
