EPA Reg. No. 264-703
EPA Reg. No. 264-634
For use on Cotton.

PRODUCT BULLETIN

FOR USE AND DISTRIBUTION ONLY IN THE STATE OF CALIFORNIA

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. It is a violation of federal law to use this product in a manner inconsistent with its label. This product bulletin must be in the possession of the user at the time of application of the product. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

Use	Crop Condition	RATE Ounces Product/A	Time of Application and Tank Mixes
Defoliation Boll opening Regrowth Suppression	For best results apply when the crop is mature and in cut-out condition.	Apply 3-6 ounces of GINSTAR® EC + 10-16 oz of FINISH® 6 Pro brand Harvest Aid followed by 6-13* ounces of Ginstar® EC + 16-32 ounces Finish® 6 Pro or Prep 1.5-2.67** pts	Apply when sufficient numbers of mature bolls are present to produce the desired crop. The second application should be made 7-10 days following the first application. Defoliation activity is temperature dependent so higher rates should be used under cooler conditions.

For best performance by ground or air application, choose equipment and spray volumes that will insure uniform coverage.

Restrictions

* Do not apply more than 1 pint of Ginstar EC per acre per season.

** Do not exceed a maximum of 2.0 lb ethephon per acre per year through combined or repeated uses of any ethephon products.
