

FIFRA 2(ee) Recommendation

Expires 12/31/2025

EPA Reg. No. 5481-629

FOR CONTROL OF BUTTONWEED, DOVEWEED, AND GOOSEGRASS IN ESTABLISHED TURF OF BERMUDAGRASS, CENTIPEDEGRASS, ST. AUGUSTINEGRASS, AND ZOYSIAGRASS: GOLF COURSES (EXCLUDING GOLF COURSE PUTTING GREENS), ATHLETIC FIELDS, COMMERCIAL AND RESIDENTIAL TURF, AND SOD FARMS/NURSERIES

FOR USE AND DISTRIBUTION IN THE STATE OF TEXAS ONLY.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ AND FOLLOW THIS SECTION FIFRA 2(ee) AND ENTIRE COASTAL LABEL BEFORE USING.

DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

FAILURE TO FOLLOW THE USE DIRECTIONS AND PRECAUTIONS ON THIS LABEL MAY RESULT IN PLANT INJURY OR POOR WEED CONTROL.

For pre- and post-emergent control of Virginia Buttonweed and Doveweed emerging from seed, use the maximum 64 oz/acre rate with an adjuvant and time the application for seedling to 5 leaf growth stage of target weeds. Consult the Coastal label for additional weeds controlled post-emergent. Significant post-emergent activity may result in control of emerging Goosegrass if treated in the seedling stage.

- 1) The addition of Metsulfuron methyl or a 3-way phenoxy herbicide will significantly increase the spectrum of weeds controlled post-emergent by this application.
- 2) The addition of foliar Iron to the tank-mix can reduce temporary turf yellowing that can occasionally occur (last for 1-3 weeks) when applied at temperatures over 85 degrees F.
- 3) Coastal herbicide applied at 64 oz/acre in May should provide summer long pre-emergent control of weeds listed on label.
- 4) Time applications after complete spring transition of turfgrasses.

NOTICE

The directions, restrictions and precautions on this and the entire COASTAL label must be read and followed carefully. This supplemental bulletin must be in the possession of the user at the time of application. Read the entire label including the WARRANTY AND LIMITATION OF DAMAGES prior to use.

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.
