

Product Bulletin

DuPont™ Afforia®

EPA Reg. No. 352-889

Special 2(ee) Recommendation†

AFFORIA® PLUS ENVIVE® FOR PREEMERGENCE CONTROL OF BROADLEAF WEEDS IN SOYBEANS

IMPORTANT NOTICE

†This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

BEFORE BUYING OR USING DUPONT PRODUCT(S) COVERED BY THIS BULLETIN, READ THIS BULLETIN, AND THE LABELS FOR ALL PRODUCTS REFERENCED IN THIS BULLETIN, IN THEIR ENTIRETY. FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS.

It is a violation of federal law to use this or any other pesticide product in a manner inconsistent with its labeling. This bulletin contains supplemental instructions for use of the referenced product. Follow these instructions carefully. This bulletin should be in the possession of the user at the time of application.

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Always read this FIFRA 2(ee) bulletin and the entire label on the product container before using this product.

ENVIVE® (Reg. No. 352-756) at 2.0 ounces per acre can be tank mixed with AFFORIA® at 1.25 ounces per acre for control of broadleaf weeds when applied preemergence to soybeans.

Application Rate of Afforia®	Equivalent lb ai Flumioxazin	Equivalent lb ai Thifensulfuron-methyl	Equivalent lb ai Tribenuron-methyl
1.25 ounces	0.032 lb ai	0.004 lb ai	0.004 lb ai

Application Rate of Envive®	Equivalent lb ai Flumioxazin	Equivalent lb ai Chlorimuron ethyl	Equivalent lb ai Thifensulfuron-methyl
2 ounces	0.037 lb ai	0.012 lb ai	0.004 lb ai

ROTATIONAL FLEXABILITY

ENVIVE® at 2.0 ounces per acre plus AFFORIA® at 1.25 ounces per acre will provide a lower level of chlorimuron ethyl that will allow rotational flexibility to crops such as corn, cotton, rice and grain sorghum the following year regardless of soil pH while maintaining the needed flumioxazin rate.

SEQUENTIAL APPLICATIONS

On soils with a composite soil pH greater than 7.0, a total of 0.25 ounce active ingredient per acre of chlorimuron ethyl can be applied in a growing season. Other herbicides containing chlorimuron ethyl at an equivalent rate may be applied in a sequential postemergence application with appropriate tank mix partners. Carefully consider soil pH, use rate combination and the Rotational Crop Guidelines for all product labels.

DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with such non-labeled use.

PRECAUTIONS AND RESTRICTIONS

Do not apply more than 1.53 ounces active ingredient flumioxazin per acre during a single growing season.

Do not apply to cracking soybeans or after the soybean crop has emerged because severe injury or death of the crop will occur.

Refer to the AFFORIA®, ENVIVE®, and any other herbicide labels used as tank mix partner or in sequential applications for information on weed species controlled, additional use directions, restrictions, rotational crop intervals and precautions. It is the pesticide user's responsibility to ensure that all products are registered for the intended use. Read and follow the applicable restrictions and limitations and directions for use on all product labels involved in tank mixing. User must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture.
