

### FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

FENPYROXIMATE	GROUP	21A	INSECTICIDE
---------------	-------	-----	-------------

EPA Reg. No. 71711-57

**Crop:** Grape

**Pest:** Powdery mildew (*Erysiphe necator*)

**States:** California, Washington

### DIRECTIONS FOR USE

**It is a violation of federal law to use this product in a manner inconsistent with its labeling.**

This labeling and the EPA approved container label must be in the possession of the user at the time of application. Read the label affixed to the container for FujiMite® 20SC Miticide/Insecticide before applying. Use of FujiMite 20SC Miticide/Insecticide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for FujiMite 20SC Miticide/Insecticide.

#### **For Management of Powdery Mildew (*Erysiphe necator*) in Grape**

- FujiMite 20SC Miticide/Insecticide is an effective contact powdery mildew fungicide. Direct contact with the fungal infection is necessary to achieve management of powdery mildew.
- FujiMite 20SC Miticide/Insecticide can be used to dessicate sporulating infections of powdery mildew on foliage and grape clusters.
- Apply FujiMite 20SC Miticide/Insecticide at 7.45 fl oz (0.105 lb ai) per acre.
- Make a foliar application using 200 to 300 gallons of water per acre or an adequate spray volume to obtain complete spray coverage of the infected foliage and fruit.
- It is recommended FujiMite 20SC Miticide/Insecticide be used with a known safe surfactant to improve spray coverage.
- To extend residual control, tank mix FujiMite 20SC Miticide/Insecticide with an effective systemic or translaminar powdery mildew fungicide.
