<b>AZOXYSTROBIN</b>	<b>GROUP</b>	<b>11</b>	<b>FUNGICIDE</b>
<b>DIFENOCONAZOLE</b>	<b>GROUP</b>	<b>3</b>	<b>FUNGICIDE</b>

**Amistar® Top**

**This supplemental label expires on 02/16/2021 and must not be used or distributed after this date.**

Active Ingredients:

Azoxystrobin\* ..... 18.2%

Difenoconazole\*\* ..... 11.4%

---

Other Ingredients: ..... 70.4%

---

Total: ..... 100.0%

\*CAS No. 131860-33-8

\*\*CAS No. 119446-68-3

Amistar Top is formulated as a suspension concentrate (SC) containing 1.67 lb of azoxystrobin active ingredient and 1.05 lb of difenoconazole active ingredient per gallon.

**KEEP OUT OF REACH OF CHILDREN.**

## CAUTION

See additional precautionary statements and directions for use on container label.

**EPA Reg. No. 100-1313**

**All applicable directions, restrictions and precautions on the EPA registered label are to be followed. Before using Amistar Top as permitted according to this supplemental label, read and follow all applicable directions, restrictions, and precautions on the EPA registered label on or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and or restrictions that may be different from those that appear on the container label. This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

## DIRECTIONS FOR USE

Crop	Target Diseases	Use Rate fl oz product/A	Remarks
Rice	Sheath Blight ( <i>Rhizoctonia solani</i> ) Aggregate Sheath Spot ( <i>Rhizoctonia oryzae-sativae</i> ) Black Sheath Rot ( <i>Gaeumannomyces graminis</i> var. <i>graminis</i> ) Sheath Spot ( <i>Rhizoctonia oryzae</i> ) Stem Rot ( <i>Sclerotium oryzae</i> ) Brown Leaf spot ( <i>Cochliobolus miyabeanus</i> ) Leaf Smut ( <i>Entyloma oryzae</i> ) Narrow Brown Leaf spot ( <i>Cercospora oryzae</i> ) Kernel Smut ( <i>Neovossia barclayana</i> )  Suppression of: False smut ( <i>Ustilaginoidea virens</i> )	10 – 15*	Apply 11.25-15 fl oz/A when disease is less than 4 inches above water line usually between panicle differentiation (PD) +5 days to PD +10 days or at initial sign of disease. Under heavy disease pressure and conditions favorable for disease development, the 15 fl oz/A rate is recommended and a second application may be applied. Minimum re-treatment interval is 14 days.  Amistar Top may be applied to a ratooned crop for control of Sheath blight.  For hybrids/varieties with partial resistance to sheath blight, the lower rate of 10 fl oz/A may be used.
	Panicle Blast ( <i>Piricularia grisea</i> )	15	Amistar Top must be applied as a preventative treatment for blast control and applied prior to favorable conditions for blast development. For panicle blast, an application should be applied at mid-boot to boot-split but prior to full head emergence. A second application should be applied when panicles are approximately 60-90% emerged from the boot (Minimum 14 days later).

\*10-15 fl oz product/A contains 0.082 to 0.123 lb difenoconazole/A and 0.13 to 0.196 lb azoxystrobin/A.

**Application:** For best results, sufficient water volume must be used to provide thorough coverage. Amistar Top can be applied by ground or aerial application. For aerial applications, use a minimum of 5 gal/A of water. Applicators should use care in making applications near non-target aquatic habitats.

---

**Specific Use Restrictions:**

- 1) Do not treat rice fields used for aquaculture of fish or crustacean.
  - 2) Do not apply when weather conditions favor drift from treated areas to non-target aquatic habitat.
  - 3) Do not allow release of irrigation or flood water for at least 14 days after the last application.
  - 4) Do not apply more than 30 fl oz/A/year of Amistar Top.
  - 5) Do not apply more than 0.7 lb ai/A/year of azoxystrobin-containing products.
  - 6) Do not apply more than 0.244 lb ai/A/year of difenoconazole-containing products.
  - 7) Do not apply Amistar Top within 28 days of harvest (28-day PHI).
  - 8) Do not drain water from treated rice fields into ponds used for aquaculture of fish or crustacean.
  - 9) Do not use water drained from treated field to irrigate other crops.
-
