

RESTRICTED USE PESTICIDE

TOXIC TO FISH, MAMMALS, AND AQUATIC ORGANISMS FOR RETAIL SALE TO AND USE ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION AND ONLY FOR THOSE USES COVERED BY THE CERTIFIED APPLICATOR'S CERTIFICATION.

FIFRA §2(ee) RECOMMENDATION
For distribution and use only
within the state of Georgia

EPA REGISTRATION NO. 5481-621

For Use on PECANS for Control of Pecan Leaf Scorch Mite

- It is a violation of Federal law to use this product inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
- This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by U.S. EPA.

DIRECTION FOR USE

For controlling pecan leaf scorch mite. (Ground application only.)

Apply Abba ULTRA when mites initially appear. To maintain control (see Use Restrictions), make a second application of Abba ULTRA after at a minimum of 21 days, if needed. Spray deposits on newer leaves (compared to older leaves) provide greater residual spider mite control.

Use conventional dilute or concentrate ground sprayers with enough water to provide thorough coverage. Volume of spray will vary with the size and number of trees per acre and foliage density. Assure thorough coverage to attain pecan leaf scorch mite control.

For best performance, apply Abba ULTRA in combination with a nonionic surfactant that spreads on and/or penetrate the leaf cuticle or apply with a Horticultural Spray Oil (not a dormant oil) that

is approved for use on Pecans. Application with a horticultural oil (not a dormant oil) is recommended for best efficacy and performance.

Pest	Rate of Abba ULTRA & Horticultural Spray Oil*	
	Dilute Sprays ¹	Concentrate Sprays ²
Pecan Leaf Scorch Mite	1.25 – 2.5 fl oz Abba ULTRA/100 gals water use 1 qt. Horticultural Spray Oil*/100 gals (i.e., 0.25% of finished spray) for best performance	5 – 10 fl oz Abba ULTRA/A use at least 1 gal Horticultural Spray Oil*/A for best performance
<p>*Not a dormant oil</p> <p>¹ Rates per 100 gals dilute spray are based on a 400 gal/acre spray volume.</p> <p>² To determine the Abba ULTRA rate per acre for concentrate sprays, it is necessary to first determine the amount needed for a full cover dilute spray. Use the same amount of product per acre in concentrate sprays as required for dilute sprays to the same grove/orchard. The result can be less than 5 fl oz/acre when used on smaller trees.</p>		

Use Restrictions — Pecan

- Do not apply within 21 days of harvest (PHI).
- Do not apply aerially.
- Do not apply in less than 40 gallons of water per acre.
- Do not retreat within 21 days of the first application.
- Do not apply more than 10 fl oz/A (0.023 lb ai/A) of Abba ULTRA per application.
- Do not apply more than 20 fl oz/A of Abba ULTRA or 0.047 lb/A of abamectin via any foliar applied product per year.
- Do not exceed 2 applications of Abba ULTRA or any other foliarly applied product containing abamectin per year.
- Do not allow livestock to graze treated groves or orchards.

Read **LIMITATION WARRANTY AND DISCLAIMER** in the label booklet for Abba Ultra Miticide/insecticide before using.
