

CHLORIMURON ETHYL	GROUP	2	HERBICIDE
-------------------	-------	---	-----------

FIFRA Section 24 (c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

CURIO® HERBICIDE

EPA Reg. No. 71368-82
EPA SLN No. OR-120001

For Control of Creeping Buttercup in Cranberries

This label is valid until December 31, 2027, or until otherwise amended, withdrawn, canceled, or suspended.

ACTIVE INGREDIENT (by weight):

Chlorimuron Ethyl

Ethyl 2-[[[[(4-chloro-6-methoxypyrimidin-2-yl)amino]carbonyl]amino]sulfonyl]benzoate 25.0%

OTHER INGREDIENTS 75.0%

TOTAL..... 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION – PRECAUCION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

ENVIRONMENTAL HAZARDS

Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater or rinsate. Do not apply where or when conditions favor runoff.

Groundwater Advisory: Chlorimuron-methyl is known to leach through soil into groundwater under certain conditions as a result of label use. This chemical may leach into groundwater if used in areas where soils are permeable, particularly where the water table is shallow.

Surface Water Advisory: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of chlorimuron-methyl from runoff water and sediment. Runoff of this product will be greatly reduced by avoiding applications when rainfall or irrigation is expected to occur within 48 hours.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and the main EPA-registered label must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the main EPA-registered label.
- Read and understand the Oregon Cranberry Growers Association Special Conditions and Disclaimer for use before using Curio Herbicide on cranberries.

NON-TARGET ORGANISM ADVISORY STATEMENT: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated area. Protect the forage and habitat of non-target organisms by minimizing spray drift. For further guidance and instructions on how to minimize spray drift, refer to the Spray Drift Management section of the main EPA-registered label.

CROP AND PURPOSE

For the post-emergence control/suppression of creeping buttercup and other incidental weeds in cranberries (bearing or nonbearing). This product will provide best results when applied to young, actively growing weeds. Do not apply this product if rain is expected within 1 hour or weed control may decrease.

APPLICATION DIRECTIONS

Apply Curio Herbicide as a broadcast application using ground application equipment at a rate of 0.5 oz. of Curio Herbicide/acre (0.01 lb chlorimuron ethyl/acre) in 20 to 40 gallons of water/acre. Do not make more than two applications per year.

Curio Herbicide may also be applied as a spot or small area treatment. To prevent misapplication, it is recommended that spot or small area applications be made using a calibrated boom, rather than a backpack sprayer.

Warning: Do not over apply. Over-application will likely cause damage.

For optimum control of creeping buttercup, it is recommended that Curio Herbicide be applied March to April. Other weeds controlled by Curio Herbicide may germinate or emerge later in the season (May to July). Do not apply within 60 days of harvest.

Curio Herbicide is a water dispersible granule that does not include a spray adjuvant. Applications must include one of the following adjuvants: a nonionic surfactant at the rate of 2 pints per 100 gallons of spray solution (0.25% v/v) or a crop oil concentrate at the rate of 2 pints per 100 gallons of spray solution (0.25%).

RESTRICTIONS

- Do not apply more than 0.5 oz. of Curio Herbicide per acre per application (0.01 lb chlorimuron ethyl per acre per application).
- Do not make more than 2 applications per year. Wait at least 30 days between applications.
- Do not apply more than 1.0 oz. of Curio Herbicide per acre per year (0.02 lb chlorimuron ethyl per acre per year).
- Do not apply within 60 days of harvest.
- Use ground equipment only. Do not apply by air. Do not apply this product through any type of irrigation system.
- Do not apply directly to water, or to areas where surface water is present. If using a boom sprayer, do not apply within 5 feet of any water moving off or through the cranberry field, unless the water in the ditches surrounding treated beds is held for 2 days after application.
- Do not mix/load, or use within 50 feet of all wells including abandoned wells, drainage wells, and sink holes.
- The NPDES Pesticide General Permit (PGP) is not required for waters that are irrigation return flow. For additional information regarding the Oregon PGP, contact Oregon Department of Environmental Quality, <https://www.oregon.gov/deq/wq/wqpermits/Pages/Pesticide.aspx>

Oregon Cranberry Growers Association Special Conditions and Disclaimer for Use of Curio® Herbicide on Cranberries.

The Oregon Cranberry Growers Association (OCGA) intends that this Section 24(c) label be distributed only by the OCGA and distributed only to OCGA members who agree in writing to the terms and conditions required by the OCGA and Nufarm including a waiver and release from all liability and indemnification by the user and/or grower of the OCGA, Nufarm and others for failure to perform and crop damage from the use of Curio Herbicide on cranberries. If such terms and conditions are unacceptable, return Curio at once, unopened.

This product when used on cranberries may lead to crop injury, loss, or damage. The OCGA recommends that the user and/or grower test this product in order to determine its suitability for such intended use. The OCGA and Nufarm make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated with the use of this product. The decision to use or not to use Curio must be made by each individual Curio user and/or grower on the basis of possible crop injury from Curio, the severity of weed infestation, the cost of alternative (pest) controls, and other factors. The OCGA intends that because of the risk of failure to perform or crop damage that all such use is at the user's and/or grower's risk, to the extent consistent with applicable law.

This Special Conditions and Disclaimer statement is required by the OCGA and Nufarm, and is not required or enforced by the USEPA or the Oregon Department of Agriculture.
