Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

For control of pine tip moth, make a soil treatment application of Acelepryn at a rate of 0.075 or 0.15 fl oz per seedling (0.001 to 0.0033 lb ai) to conifer trees. Apply to seedlings in nurseries prior to transplanting in the field.

Follow all other use directions, restrictions and precautions on the Acelepryn EPA-registered label.
