Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Apply a single application of 1 fluid ounce of Contend A per 1000 square feet of turf (44 ounces per acre) tank mixed with 2.6 fluid ounces of Contend B per 1000 square feet of turf (114 ounces per acre) in the late fall before snow cover. Do not apply on top of snow. For optimum disease control on greens, tank-mix with a fungicide from a different FRAC group such as Daconil or Medallion may enhance control.
