

CYCLOATE	GROUP 8	HERBICIDE
----------	---------	-----------

FIFRA SECTION 24(c) – SPECIAL LOCAL NEED (SLN) LABEL

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

**HELM AGRO INTENDS THAT THIS SECTION 24(c) LABEL WILL ONLY BE
DISTRIBUTED BY THE PUGET SOUND SEED GROWERS ASSOCIATION TO
CONTRACTED GROWERS**

**HELM AGRO
RO-NEET® HERBICIDE**

EPA Reg. No. 74530-16

EPA SLN No. WA-150004

For Control of Listed Weeds on Spinach Grown for Seed

**This label for RO-NEET HERBICIDE expires and must not be distributed or used in
accordance with this SLN registration after December 31, 2029.**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and the EPA registered label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the EPA-registered label.

SPINACH GROWN FOR SEED: Apply 1/3 gallon of RO-NEET HERBICIDE (2 lbs. ai) in a minimum of 10 gallons of water per acre prior to planting. Apply RO-NEET HERBICIDE per the direction of use on the Section 3 label. Use on sandy mineral soils only. Immediately (within minutes) after application thoroughly mix RO-NEET HERBICIDE into the soil to a depth of 2 to 3 inches. Whenever possible, application and incorporation should be done in the same operation. Use equipment which has been proven to incorporate thoroughly to the recommended depth.

WEEDS CONTROLLED:

Annual bluegrass	Poa annua
Annual Ryegrass	Lolium multiflorum
Barley, volunteer	Hordeum spp.
Barnyardgrass (watergrass)	Echinochloa spp.
Crabgrass	Digitaria spp.
Foxtails	Setaria spp.
Wild oats	Avena fatura

ANNUAL BROADLEAF WEEDS

Black nightshade	Solanum nigrum
Hairy nightshade	Solanum villosum
Henbit, deadnettle	Lamium spp.
Lambsquarters	Chenopodium album
Nettleleaf goosefoot*	Chenopodium murale
Purslane common	Portulaca oleracea
Redroot pigweed	Amaranthus retroflexus
Shepherdspurse	Capsella bursa-pastoris
Small stinging nettle/	Urtica urens
Burning nettle	
Velvetleaf**	Abutilon theophrasti

*California excluded

**Partial control or suppression only

The above broadleaf weeds will be controlled only if application is made when conditions are favorable for germination. RO-NEET HERBICIDE SELECTIVE HERBICIDE WILL NOT CONTROL ESTABLISHED OR GERMINATED WEEDS PRESENT AT APPLICATION.

PERENNIAL WEEDS

Yellow nutsedge	Cyperus esculentus
Purple nutsedge	Cyperus rotundus

Existing stands of nutsedge must be turned under and chopped thoroughly before treatment. Prior to planting, RO-NEET HERBICIDE must be thoroughly mixed into the soil or applied subsurface to the soil with injectors for nutsedge control.

RESTRICTIONS / PRECAUTIONS:

- The restricted entry interval (REI) for RO-NEET HERBICIDE is 48 hours. Do not allow entry by unprotected persons into the treated area during the REI.
- Do not make more than one (1) application per year. If Ro-Neet Herbicide is applied in the fall, do not reapply Ro-Neet Herbicide the following spring. Use a maximum of 1/2 gallon (3 pounds active ingredient) per acre per single application.
- Do not exceed one application per year.
- For use under this SLN label do not apply this product through any type of irrigation system.
- For Use on Sandy Mineral Soils Only.
- Stunting and transient crop injury from RO-NEET HERBICIDE has been observed in spinach grown for seed. Crop injury may result from unfavorable environmental conditions.
- Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from target area. Do not contaminate water when disposing of equipment wash water or rinsate.
- NON-TARGET ORGANISM ADVISORY: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize spray drift.
- Registered crops may be rotated immediately to other registered crops (spinach and beets); however, all non-registered crops would need to adhere to the above plant back intervals to ensure that quantifiable residues are not found in rotated crops.
- Plant Back Intervals
 - Leafy vegetables: 45-day PBI
 - Root vegetables: 45-day PBI
 - All other crops: 120-day PBI

• Crops Grown for Seed Restrictions:

- All spinach seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the director immediately upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter, or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the grower(s), and the date of disposal.
- No portion of the spinach seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.
- Spinach seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Spinach seed may not be distributed for human consumption or animal feed.

WSDA CONTAINER DISPOSAL GUIDANCE:

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA website under the Waste Pesticide Program.

Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

HELM AGRO'S Special Conditions and Disclaimer for use of Ro-Neet Herbicide on Spinach Grown for Seed

HELM AGRO intends that this Section 24(c) label be distributed by the Puget Sound Seed Growers Association only to end users and/or growers who agree in writing to the terms and conditions required by the Puget Sound Seed Growers Association including a waiver and release from all liability and indemnification by the user and/or grower of HELM AGRO, Puget Sound Seed Growers Association, and others for failure to perform and crop damage from the use of RO-NEET HERBICIDE on spinach grown for seed. If such terms and conditions are unacceptable, return RO-NEET HERBICIDE at once unopened.

This product when used on spinach grown for seed may lead to injury, loss, or damage. HELM AGRO recommends that the user and/or grower test this product in order to determine its suitability for such intended use. The Puget Sound Seed Growers Association and HELM AGRO make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh, the extent of potential injury associated with the use of this product. The decision to use or not to use this RO-NEET HERBICIDE must be made by each individual RO-NEET HERBICIDE user and/or grower on the basis of possible crop injury from the RO-NEET HERBICIDE, the severity of weed infestation, the cost of alternative weed controls and other factors. HELM AGRO intends that because of the risk of failure to perform or crop damage that all such use is at the user's and/or grower's risk, to the extent consistent with applicable law.

This Special Conditions and Disclaimer statement is required by HELM AGRO and is not required or enforced by the USEPA or the WSDA.
