

## Supplemental Labeling

EPA Reg. No. 7969-137

EPA SLN No.: TN-050003

FOR DISTRIBUTION AND USE ONLY IN THE STATE OF TENNESSEE

### FOR THE CONTROL OF ANNUAL WINTER BROADLEAF WEEDS, INCLUDING GLYPHOSATE RESISTANT MARESTAIL (HORSEWEED), AS A PREPLANT BURNDOWN TREATMENT PRIOR TO COTTON PLANTING

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered product label for Clarity® herbicide, EPA Reg. No. 7969-137.

This labeling must be in the possession of the user at the time of application.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Read the **Precautionary Statement, Environmental Hazards, Storage and Disposal** statements, and **Conditions of Sale and Warranty** statement appearing on the container label.

#### GENERAL INFORMATION

**Clarity herbicide** is a water-soluble formulation intended for control and suppression of many annual (including glyphosate resistant marestail), biennial and perennial broadleaf weeds as well as woody brush and vines listed in **Table 1** of the **Clarity** main label.

#### USE RESTRICTIONS

**Maximum seasonal use rate:** Do not exceed 8 fluid ounces of **Clarity** per acre, per year.

**Rainfast period:** Rainfall or irrigation occurring within 4 hours after postemergence applications may reduce the effectiveness of **Clarity**.

**Crop rotational guidelines:** Refer to **Clarity** main label.

**DO NOT** apply through any type of irrigation equipment. Do not treat irrigation ditches or water used for crop irrigation or domestic purposes.

#### ADDITIVES

To improve postemergence weed control, agriculturally approved surfactants, sprayable fertilizers (urea ammonium nitrate or ammonium sulfate) or crop oil concentrate may be added, particularly in dry growing conditions.

Additive	Rate Per Acre
Nonionic Surfactant	1-2 pints per 100 gallons
AMS	2.5 pounds
UAN Solution	2-4 quarts
Crop Oil Concentrate	1 quart*

\* see manufacturer's label for specific rate recommendations

## SPRAYING INSTRUCTIONS

**Clarity® herbicide** can be applied to actively growing weeds as aerial, broadcast, band or spot spray applications using water or sprayable fertilizer as the carrier.

To avoid uneven spray coverage, **Clarity** should not be applied during periods of gusty wind or when wind is in excess of 15 mph.

Avoid off-target movement. Use extreme care when applying **Clarity** to prevent injury to desirable plants.

Refer to **Clarity** main label for information regarding aerial and ground application recommendations and restrictions.

## APPLICATION TIMING AND USE RATE

### PREPLANT APPLICATION TO COTTON:

Apply up to 8 fluid ounces of **Clarity** to control emerged broadleaf weeds (including glyphosate resistant marestail) prior to planting cotton in conventional or conservation systems.

For best performance, apply **Clarity** when weeds are in the 2-4 leaf stage and rosettes are less than 2" across.

**Following application of Clarity and a minimum accumulation of 1" rainfall or overhead irrigation, a waiting interval of 15 days is required before cotton planting can begin.**

**DO NOT** apply preplant to cotton west of the Rockies.

**DO NOT** apply preplant to cotton in geographic areas with average annual rainfall less than 25".

For areas East of the Rockies and outside of the use area described by this supplemental label, refer to the **Clarity** main label for use directions and precautions.
