Princep Caliber 90 is a water-dispersible granule that contains 90 lb of simazine per 100 lb of product.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

Environmental Hazards

Follow all applicable directions, restrictions, and precautions in the Environmental Hazards section of the label affixed to the main container of Princep Caliber 90 Herbicide (EPA Reg. No. 100-603).

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Section 24(c) label and the label affixed to the main container of Princep Caliber 90 Herbicide must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this Section 24(c) label and on the label affixed to the main container of Princep Caliber 90 Herbicide.
- FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR PEST CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

Application Directions

Apply the spray to the orchard floor, avoiding contact with fruit, foliage, stems, or trunk. Specified rates are based on broadcast treatment. For band applications or spot applications around sweet cherry trees, reduce the broadcast rate of this product and water per acre in proportion to the area actually sprayed. Immediately following application, limit overhead sprinkler irrigation to ½ inch.

To control annual weeds prior to emergence, apply 1.75-4.4 lb of Princep Caliber 90 Herbicide in a minimum of 20 gallons of water per acre in late fall to early spring prior to weed emergence. For a list of annual weeds controlled, see Table 1 on the label affixed to the main container of Princep Caliber 90 Herbicide.

To control emerged weeds at the time of herbicide treatment, refer to Table 2 of the label affixed to the main container of Princep Caliber 90 Herbicide for appropriate tank mix partners. Observe all directions, limitations and precautions on the tank mixture product label when used in tank mix combination with Princep Caliber 90 Herbicide.

When retreating in subsequent years, especially if preemergence weed populations are low, reduce the dosage to 2-3 lb maximum of Princep Caliber 90 Herbicide per acre.

Restrictions

- Applications made by mechanically pressurized handguns are restricted to spot treatment only.
- **Do not** harvest crop for 21 days following application.
- **Do not** apply on gravelly, sand or loamy sand soil.
- **Do not** apply to orchards where trees have been established for less than two years.
- **Do not** apply more than 4.4 lb Princep Caliber 90 Herbicide (4 lb ai) per acre per calendar year.
- **Do not** apply more than once per acre per calendar year.
- Aerial application is prohibited.
- **Do not** apply this product through any type of irrigation system.
