## DESCRIPTION

Phosron® Soil is a soil-applied liquid nutrient that is designed to provide available Phosphate that may be deficient in the soil or plant.

## DIRECTIONS FOR USE

For best results, use watered-in applications. May be applied via irrigation system or prior to irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach. Use the higher label rates with surface and flood irrigation.

When mixing with other material such as Calcium or other micronutrient fertilizers, always establish compatibility using the standard quart jar method prior to tank mixing. When blending with micronutrients additional water and agitation may be required.

Do not apply if a heavy rain is expected. Do not apply near water, storm drains, or drainage ditches or to any impervious surface. Apply only to the intended application area.

## RATES & TIMING FOR ALL CROPS

Orchards and Vineyards: **5-20 gallons/acre**

Field and Row Crops: **1-10 gallons/acre**

Vegetables and Other Specialty Crop: **5-10 gallons/acre**;

Apply anytime during the growing season; repeat as needed.

## INSTRUCCIONES DE USO

Para obtener mejores resultados, utilice aplicaciones con agua. Puede aplicarse mediante sistema de riego o antes del riego. Aplique suficiente agua para mover el producto al área de enraizamiento activo, pero no cantidades excesivas que puedan lixiviarse. Utilice las tasas más altas de la etiqueta con riego por superficie y por inundación.

Al mezclar con otro material como calcio u otros fertilizantes con micronutrientes, siempre establezca la compatibilidad utilizando el método estándar de frascos de un cuarto de galón antes de mezclar en el tanque. Al mezclar con micronutrientes, es posible que se requiera agua adicional y agitación.

No aplique si se espera una lluvia fuerte. No aplique cerca de vías acuáticas, alcantarillas o acequias de drenaje. Aplique únicamente en la zona de interés.

## TASAS Y MOMENTO PARA TODOS LOS CULTIVOS

Huertos y viñedos: **5 - 20 galones/acre**

Cultivos de campo y en hileras: **1 - 10 galones/acre**

Hortalizas y otros cultivos especiales: **5 - 10 galones/acre**;

Aplicar en cualquier momento durante la temporada del cultivo; repita según sea necesario.

**WARNING:** The application of fertilizer material containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.

**READ ENTIRE LABEL BEFORE USE | KEEP OUT OF REACH OF CHILDREN**
