CROP	RATE OF APPLICATION	RESTRICTIONS
Pears	6.4 – 12.8 oz. product/A (0.1 – 0.2 lb ai/A)	<ul style="list-style-type: none"> • DO NOT exceed 12.8 oz product/A (0.2 lb ai/A) per application. • DO NOT exceed 32 oz product/A (0.5 lb ai/A) per year with no more than 28.8 oz product/A (0.45 lb ai/A) applied after petal fall. • DO NOT make more than 3 applications per year. • DO NOT graze livestock in treated orchards or cut treated cover crops for feed. • Minimum re-treatment interval (RTI) is 30 days. • DO NOT apply within 14 days of harvest.
<p>Use Directions:</p> <p>Application by ground: Apply as a dilute (minimum of 200 gallons of finished spray per acre) or concentrate (minimum of 50 gallons of finished spray per acre) spray in sufficient water to provide thorough coverage.</p> <p>Application by air: Apply the specified dosage in a minimum of 10 gallons of finished spray per acre by air.</p>		

GENERAL DIRECTIONS FOR USE (ALL LISTED CROPS):

Thorough coverage is essential to achieve control.

Multiple applications may be required to maintain control and prevent reinfestation from migrating adults into the crop. Spotted lanternfly are mobile and may re-infest crops quickly. If another treatment is needed before the minimum retreatment interval, use another insecticide to maintain control.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Protect pollinating insects by following label intended to minimize drift to reduce risk to these organisms.

The use of bifenthrin is prohibited in areas that may result in exposure of endangered species to bifenthrin. Prior to use in a particular county contact the local extension service for procedures and precautions to use to protect endangered species.
