④ INSTRUCTIONS:

Pre-Blending or Tank Mixing Rates:

LIQUID FERTILIZERS

If mixing with liquid fertilizers, perform a Jar Test to assure compatibility with different mixtures of chemicals. It is typically recommended to mix in the following order.

- fertilizers
- water
- iNvigorate

iNvigorate® Application Rates per Acre:

Starter or Side Dress:	1 to 2 quarts per acre
Broadcast:	2 to 4 quarts per acre for Ag use

General application instructions:

One season of general high intensity commercial use, apply a total of:
iNvigorate: 10 liters per hectare / 1 gallon per acre of concentrate

Apply 20% of the total season's product use at the start of the growing season. Apply remaining product evenly in 2 week intervals.
The solution is applied to the soil and watered in thoroughly.

Shake/Agitate before using.

Agrinos highly recommends following a specific application protocol as provided by your representative!

Dispose of this container properly

This product is guaranteed, for the validity period marked above, to be free of defects of manufacture, production, quality assurance or other faults. If this product is found to be defective, please return it to your Agrinos representative for replacement. This guarantee is void where prohibited and/or if this product has not been stored in accordance with instructions. Due to the many factors affecting crop performance Agrinos can not guarantee the effectiveness of the product in use. Any / all warranties or guarantees of this nature are expressly denied.
