Directions For Use

Refer to the Alite™ 27 herbicide container label, EPA Reg. No. 7969-433, for complete Directions For Use and all applicable restrictions and precautions. ENVIRONMENTAL HAZARDS

Agricultural chemicals have the potential to move into shallow groundwater. The following restrictions have been developed to protect drinking water supplies.

- In fields having soils with less than 15% field moisture holding capacity, special care must be taken not to over-irrigate, since substantial over-irrigation promotes the leaching of chemicals.

COUNTY RESTRICTIONS

- **DO NOT use in the following counties in Missouri: Butler, Cape Girardeau, Dunklin, Mississippi, New Madrid, Pemiscot, Scott, and Stoddard.**

SOIL TYPE RESTRICTIONS

- If the water table is less than 25 feet below the ground surface, **DO NOT** apply to the following restricted loamy sand or sand soils. If the water table is unknown, do not apply **Alite 27** to a restricted soil. If a field contains several soil types, one of which is a restricted soil listed below, and the water table is less than 25 feet, **DO NOT** apply **Alite 27**.
