

# SUPPLEMENTAL LABEL

## FOR USE ON BERRY AND SMALL FRUIT (SUBGROUP 13-07F) SMALL FRUIT VINE CLIMBING, EXCEPT FUZZY KIWI FRUIT

### KEEP OUT OF REACH OF CHILDREN CAUTION

- This labeling must be in the possession of the user at the time of pesticide application.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on the EPA-registered label are to be followed.

#### DIRECTIONS FOR USE ON BERRY AND SMALL FRUIT (subgroup 13-07F) SMALL FRUIT VINE CLIMBING, EXCEPT FUZZY KIWI FRUIT

CROP	PEST	RATE	COMMENTS
Amur river grape Gooseberry Grape Kiwifruit, hardy Maypop Schisandra berry Cultivars, Varieties and/or hybrids of these	Glassy-Winged Sharpshooter Grape Berry Moth (first and second generation only) Leafhoppers Mealybug Multi-colored Asian Lady Beetle Thrips	<b>FOLIAR:</b> 1.75 to 5.25 fl oz/A (0.045 to 0.135 lb ai/A)	<b>Higher water volumes provide improved insect control.</b>  Begin applications when first pest activity is noticed or when insects reach threshold levels per State and County Extension Service recommendations. Repeat as needed to maintain control, but not more often than every 14 days. For best results, time application before a damaging population becomes established.  Under severe pest pressure, use the higher specified rates.  For Mealybug control, apply between budbreak and pea-berry size.
	Glassy-Winged Sharpshooter Grape Phylloxera (suppression only) Leafhoppers Mealy bug Thrips Vine Mealybug	<b>SOIL:</b> 9 to 13.25 fl oz/A (0.225 to 0.338 lb ai/A)	The rate applied affects the length of control. Use the high rate where infestations occur later in crop development, or where pest pressure is continuous.  <i>SCORPION</i> can be mixed and/or alternated with commonly used insecticides, such as <i>Danitol</i> or <i>Knack</i> , for better knockdown and/or improved control of pests.
<p><b>NOTE:</b> Regardless of application method, do not apply more than a total of 21.25 fl oz/A of SCORPION (0.540 lb ai) per acre per season.</p> <p><b>Foliar Application</b></p> <ul style="list-style-type: none"> <li>• Apply with air or ground equipment in adequate water for uniform coverage (5 to 10 gals/A by air or 50 to 300 gals/A by ground).</li> <li>• Do not apply SCORPION within one (1) day of harvest.</li> <li>• Do not apply more than a total of 10.5 fl oz/A of SCORPION (0.270 lb ai) per acre per season.</li> </ul> <p><b>Soil Application</b></p> <ul style="list-style-type: none"> <li>• Make only one (1) soil application per season.</li> <li>• Apply with ground equipment in adequate water for uniform coverage (10 to 100 gals/A).</li> <li>• Do not apply SCORPION within twenty-eight (28) days of harvest.</li> <li>• Do not apply more than a total of 13.25 fl oz/A of SCORPION (0.338 lb ai) per acre per season.</li> <li>• For drip application, prior to injection, mix specified dosage in sufficient carrier volume (minimum of 2 gals of water per 1 lb of product) to ensure uniform application and incorporation into the soil using drip or trickle irrigation water. Apply towards the end of the irrigation run to ensure the product does not leach past the root zone.</li> </ul>
