Radiant SC

EPA Reg. No. 62719-545

EPA SLN No. HI-240002

For Distribution and Use Only in the State of Hawaii

Control of thrips in seed corn grown in protected agricultural structures, such as greenhouses and shadehouses

Expiration date: This label expires and must not be distributed or used in accordance with this SLN registration after March 11, 2029.

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read this SLN and the label affixed to the container for this product before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of this product according to this FIFRA 24(c) Special Local Need labeling is subject to all use precautions and limitations imposed by the label affixed to the container for this product.

Directions for Use

Refer to product labeling for Use Precautions and Restrictions, Mixing and Application instructions.

Seed Corn grown in protected agricultural structures, such as greenhouses and shadehouses.

Pests and Application Rates:

Pests	Radiant SC (fl oz/acre)
Thrips ¹	6

¹Control of thrips may be improved with the addition of an adjuvant to the spray mixture. See Use of Adjuvants section under Mixing Directions on the Radiant SC product label.

Application Timing: : Scout weekly throughout the season to monitor and track populations of thrips to determine when economic thresholds are exceeded. For thrips, a 4-day re-treatment schedule may be necessary if there is heavy pest pressure or if the pest population is increasing rapidly

Application Rate: Apply Radiant SC as a foliar spray at the rate specified to control target pests.

Resistance Management: Do not make more than two consecutive applications of Group 5 insecticides (spinetoram and spinosad). If additional treatments are required after two consecutive applications of Group 5 insecticides, rotate to another class of effective insecticides for at least one application. Do not make more than three applications of Group 5 insecticides for thrips in a crop cycle. Consult your Corteva Agriscience representative, extension specialist, certified crop advisor, or state agricultural experiment station for information

on alternative effective products to use in your area. Do not apply in the production of transplants intended for field use.

Restrictions:

- **Preharvest Interval:** Do not apply within 1 day of grain harvest.
- Do not apply more than a total of 36 fl oz of Radiant SC (0.281 lb ai spinetoram) per acre per year.
- **Maximum Number of Applications:** Do not make more than six applications per calendar year (3 complete crop cycles).
- **Maximum Number of Applications:** Do not make more than 2 applications per crop cycle.
- **Minimum Treatment Interval:** Do not make applications less than 4 days apart.
- Do not use in the production of corn field transplants.
- Greenhouse minimum ground spray volume: 15 GPA.
