

## FIFRA 2(ee) RECOMMENDATION

For postemergence prickly  
sida/teaweed control in field corn

EPA Reg. No. 5481-677

**FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF Alabama, Arkansas,  
Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, New Jersey,  
North Carolina, Ohio, Pennsylvania, Tennessee, Virginia**

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

---

### Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**THIS BULLETIN MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF APPLICATION.**

Before applying **PYTHON**® please read the complete label affixed to the product container. All applicable directions, restrictions and precautions on the EPA-registered label are to be followed. Use of **PYTHON** according to this supplemental labeling is subject to the use precautions and limitations imposed by the label on the container.

**IMPORTANT:** Read the entire Directions for Use and the Limited Warranty and Disclaimer on the EPA-registered **PYTHON** herbicide label before using this product.

---

### Use Information

For postemergence control of prickly sida/teaweed (*Sida spinosa*) in field corn, apply **PYTHON** at the rates indicated below plus adjuvants:

- Up to 2 inches tall, use **PYTHON** at 0.23 oz/acre.
- Up to 3 inches tall, use **PYTHON** at 0.46 oz/acre.
- Up to 6 inches tall, use **PYTHON** at 0.69 oz/acre.

#### Adjuvants

- Always include nonionic surfactant at 1 qt/100 gal water (0.25% v/v) or crop oil concentrate at 1 gal/100 gallons water (1% v/v).
- Adding urea ammonium nitrate (28-32%) at 2.5 gallons per 100 gallons (2.5% v/v) or ammonium sulfate (AMS) at 2 lb per acre may enhance control under extremely dry growing conditions. A liquid AMS product

which provides a rate equivalent to 2 lb dry AMS per acre may be used. Liquid AMS solutions contain approximately 3.4 lbs of AMS per gallon.

**Application Information**

Apply in at least 15 gallons water per acre using nozzles that produce medium sized droplets for optimum performance.

Refer to the **PYTHON** and any tank mix partner labels for information on weed species controlled, additional use directions, restrictions, rotational crop intervals, and precautions. It is the pesticide user's responsibility to ensure that all products are registered for the intended use. Read and follow the applicable restrictions and limitations and directions for use on all product labels involved in tank mixing. Users must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture.
