## Fontelis®

EPA Reg. No. 352-834  
EPA SLN No: CA-230005

For Distribution and Use Only in the State of California

### FOR CONTROL OF FOLIAR AND SOIL-BORNE PLANT DISEASES IN POTATOES

This label expires and must not be distributed or used in accordance with this SLN registration after **11/30/2026**.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, and precautions on the EPA-registered label for Fontelis (EPA Reg. No. 352-834) and this label.

### Directions for Use

Fontelis is a broad-spectrum fungicide, recommended for control of foliar and soil-borne plant diseases in many crops, including potatoes, and has preventive, curative, and locally systemic activity. Fontelis must be applied in a regularly scheduled protective spray program in rotation with other fungicides.

Disease Controlled or Suppressed	Product Rate fl oz/acre	Comments
Alternaria early blight and brown spot (Alternaria solani, Alternaria alternata) Gray mold (Botrytis cinerea) Powdery mildew (Erysiphe spp.)	10 to 24 fl oz	Begin applications prior to disease development and continue on a 7- to 14-day interval. Use higher rate and shorter interval when disease pressure is high.
Black dot (Colletotrichum coccodes)	14 to 24 fl oz	
<b>Disease suppression</b> White mold (Sclerotinia sclerotiorum)	14 to 24 fl oz	Make initial application at 100% full bloom of the primary inflorescence, or prior to row closure, and then again 14 days later.

<b>Soil-borne diseases</b> Rhizoctonia stem canker and black scurf (Rhizoctonia solani)	0.7 to 1.6 fl oz/1000 row-ft	Only for at-plant, in-furrow application. Maximum rate per acre per application is 24 fl oz.  Fontelis can provide suppression or control of soilborne diseases when applied early in the growing season. A single early season application of Fontelis can be made to the soil by in-furrow application.  <b>In-furrow application:</b> Apply Fontelis as an in-furrow spray in 3-15 gallons of water at planting. Adjust the spray pattern so the spray is directed into the furrow on the seed and surrounding soil. The spray pattern should be a 4- to 8-inch band that is applied to the seed just prior to being covered with soil. Refer to the Soil Application Rates table.
---	------------------------------	---

### Chemigation:

This product may be applied through irrigation systems. Refer to the EPA registered label for chemigation directions. Apply Fontelis only through drip (trickle) or strip tubing irrigation systems and sprinkler irrigation systems (such as center pivot, lateral move, side (wheel) roll, and solid set irrigation systems).

### Soil Application Rates for Potatoes

Rate per 1000 row feet	Product per Acre (fl oz) <sup>a</sup>						
	22 " rows	30 " rows	32 " rows	34 " rows	36 " rows	38 " rows	40 " rows
fl oz prod/ 1000 ft row							
0.7	16.7	12.2	11.4	10.9	10.2	9.6	9.2
1.2	28.6 <sup>b</sup>	20.9	19.6	18.5	17.4	16.5	15.7
1.6	-	27.9 <sup>c</sup>	26.1 <sup>d</sup>	24.6 <sup>e</sup>	23.0	22.0	21.1

<sup>a</sup> Consult the maximum rate per acre allowed for the crop, and do not exceed that rate when using this application method.

<sup>b</sup> In 22 inch rows, the highest rate for crops with 24 fl oz/acre maximums is 1.0 fl oz/1000 ft row.

<sup>c</sup> In 30 inch rows, the highest rate for crops with 24 fl oz/acre maximums is 1.38 fl oz/1000 ft row.

<sup>d</sup> In 32 inch rows, the highest rate for crops with 24 fl oz/acre maximums is 1.47 fl oz/1000 ft row.

<sup>e</sup> In 34 inch rows, the highest rate for crops with 24 fl oz/acre maximums is 1.56 fl oz/1000 ft row.

**Fontelis fungicide labeled Potato Crop, Pre-Harvest Intervals, Maximum Single Application Rates, and Total Rates allowed per year**

<b>Minimum Time from Application to Harvest (PHI days or crop stage)</b>	<b>Maximum Rate per Acre per Application fl oz product (lb active ingredient)</b>	<b>Maximum Product per Acre per Year fl oz product (lb active ingredient)</b>
7 days	24 fl oz (0.31 lb)	72 fl oz (0.94 lb)

**Restrictions/Precautions**

- Use this product only in commercial and farm plantings.
- Do not use for home plantings.
- Do not formulate this product into other end-use products.
- Make no more than 2 sequential applications of Fontelis before switching to a fungicide with a different mode of action.
- Minimum time (PHI) between application and harvest is 7 days.
- Do not exceed 72 fl oz (0.94 lb active ingredient) of Fontelis/acre per year.
- Do not use Fontelis fungicide for an in-furrow application when penthiopyrad has been applied as a seed piece treatment for potatoes.
- Do not apply more than two in-season foliar potato applications of Fontelis at the maximum single application rate when penthiopyrad has been used as a seed piece treatment for potatoes.
- Do not apply more than 15 ounces of penthiopyrad active ingredient/acre/year to potatoes in total from any combination of seed, soil, or foliar treatments.
- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.
