

TECHNICAL INFORMATION BULLETIN
FOR THE USE OF REGALIA® BIOFUNGICIDE
FOR SUPPRESSION OF
Bacterial Spot (*Xanthomonas arboricola* pv *pruni*) on Almonds

FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U. S. Environmental Protection Agency.

FOR USE IN ALL STATES WHERE CROP AND PEST(S) EXIST AND WHERE 2(EE) RECOMMENDATIONS ARE RECOGNIZED.

Regalia® Biofungicide
EPA Reg. No. 84059-03

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crop	Target Disease	Application Method	Product Use Rate per Application	Application Instructions
Almonds	Bacterial spot	Foliar (Ground application) in 50 – 100 gallons of water per acre	1-2 quarts per acre	REGALIA® Biofungicide is a FRAC P5 fungicide that triggers the production of plant defense compounds and therefore attention to conditions conducive to the development of bacterial spot is important. Applications should be made when disease is first noted is necessary for optimal results. For additional control REGALIA® Biofungicide can be tank-mixed with fungicides containing copper or mancozeb. When conditions favorable to disease persist, reapplication on a 7 day interval is recommended.
REGALIA® Biofungicide has a pre-harvest interval (PHI) of 0 days. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.				

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

This recommendation must be in the possession of the user at the time of pesticide application.
