

ACEPHATE	GROUP	<b>1B</b>	INSECTICIDE
----------	-------	-----------	-------------

**For distribution and use only within the  
state of WASHINGTON**

**FIFRA SECTION 24(c) Special Local Need (SLN) Label  
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON  
ORTHENE® 97**

**FOR CONTROL OF CABBAGE APHID, GREEN PEACH APHID, DIAMONDBACK MOTH, CABBAGE LOOPER  
AND IMPORTED CABBAGE WORM IN RADISH GROWN FOR SEED ONLY**

EPA REG. NO. 5481-8978

EPA SLN NO. WA-050015

**This label for Orthene 97 expires and must not be distributed or used in accordance with this SLN  
registration after December 31, 2029.**

**DIRECTIONS FOR USE**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions on this SLN label and the EPA-registered label.
- This SLN label and the federal label for this product must be in the possession of the user at the time of pesticide application.

**RADISH: (SEED CROP ONLY) -- FOR CONTROL OF CABBAGE APHID, GREEN PEACH APHID,  
DIAMONDBACK MOTH, CABBAGE LOOPER AND IMPORTED CABBAGE WORM**

Apply 1 lb. (0.97 lbs ai/A acephate) Orthene 97 per application per acre in 10 to 60 gallons of spray mix by ground as a broadcast foliar application or in 5 to 10 gallons of spray mix by air.

**RESTRICTIONS**

- Do not use on the daikon radish variety.
- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours.
- Do not feed crop residues to livestock or allow animals to graze treated areas.
- Do not apply more than 2 lb. product (1.95 lb. a.i./A) per year.
- For repeat application, user must allow a minimum of 7 days between applications.

- For use in accordance with this SLN label, **do not** apply this product through any type of irrigation system.
- Do not apply using low pressure handwand equipment.
- This product and its degradate are highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging the treatment area. FOR FOLIAR APPLICATIONS OF THIS PRODUCT TO A CROP WHERE BEES ARE UNDER CONTRACT TO POLLINATE THAT CROP: Foliar application of this product is prohibited to a crop from onset of flowering until flowering is complete when bees are under contract for pollination services to that crop unless the application is being made in the time period between 2-hours prior to sunset until sunrise.

#### **CROPS GROWN FOR SEED:**

- All radish (other than daikon) seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the director immediately upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter, or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the grower(s), and the date of disposal.
- No portion of the radish (other than daikon) seed plant, including but not limited to, green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves, and seed screenings may be used or distributed for food or feed purposes.
- Radish (other than daikon) seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Radish (other than daikon) seed may not be distributed for human consumption or animal feed.

**WSDA CONTAINER DISPOSAL GUIDANCE:** Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA website under the Waste Pesticide Program. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the country. Burning is not a legal method of container disposal in Washington.
