

CONDITIONER

ONLY FOR USE AS AN ADJUVANT WITH ATROFORCE

GENERAL INFORMATION:

This product is a conditioner designed to improve the miscibility of Atrforce with water.

Keep container tightly closed in order to prevent contamination. Use within 8 hours of opening if stored at room temperature or warmer. Use within 1 week if refrigerated after opening.

DIRECTIONS FOR USE:

MIXING INSTRUCTIONS: Best results are achieved when bucket slurring: adding Atrforce, then adding Conditioner, then mixing before addition to the application slurry tank. Equal parts of Atrforce & Conditioner are always used. If in-line screens or filtration is used, DO NOT USE screens smaller than 50 mesh. DO NOT mix with chlorinated water.

1. Calculate batch quantities for all mix components based on Directions for Use of Atrforce.
2. Prepare a mix container that is separate from the slurry container or treatment tank.
3. Measure and add Atrforce to this separate mix container. Measure Atrforce by volume.
4. Measure and add an equal amount of Conditioner to this separate mix container. Measure Conditioner by volume.
5. Mix or stir the Atrforce and Conditioner until both are combined. Once combined, additional diluents may be added to container for ease of pouring.
6. Agitate and add Atrforce and Conditioner blend to the seed treat tank, slurry tank, or treatment tank. Maintain agitation as long as the Atrforce and Conditioner is in the tank. Agitation is needed in order to maintain suspension.
